DRAGONLOCK

TERRAIN FOR YOUR 3D PRINTER
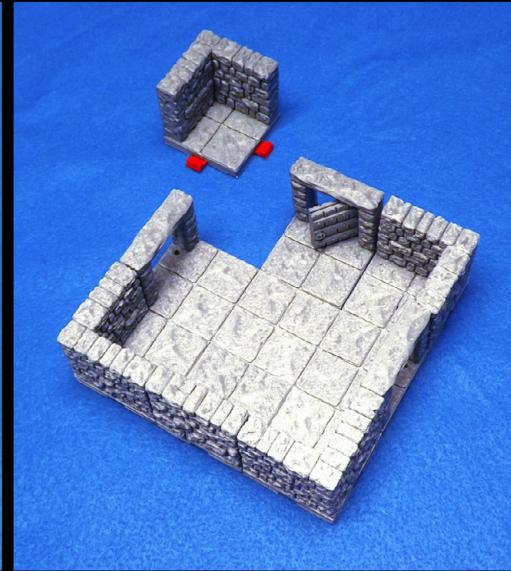

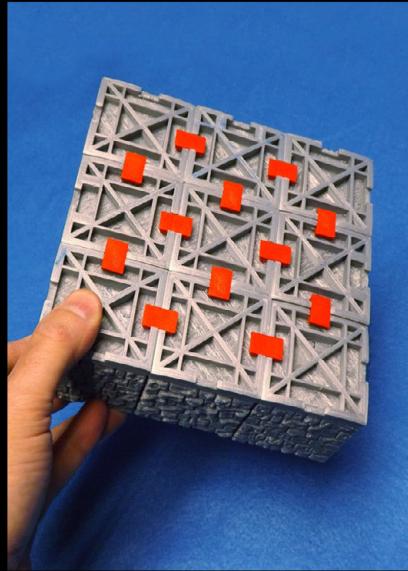

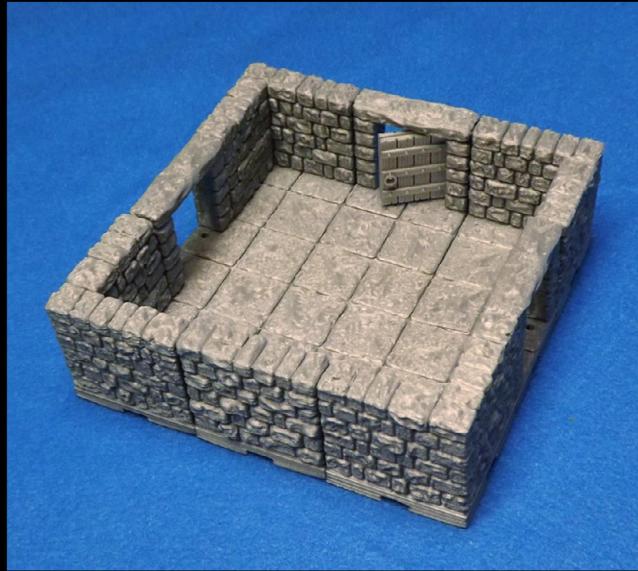

DRAGONLOCK CLIPS 2.0
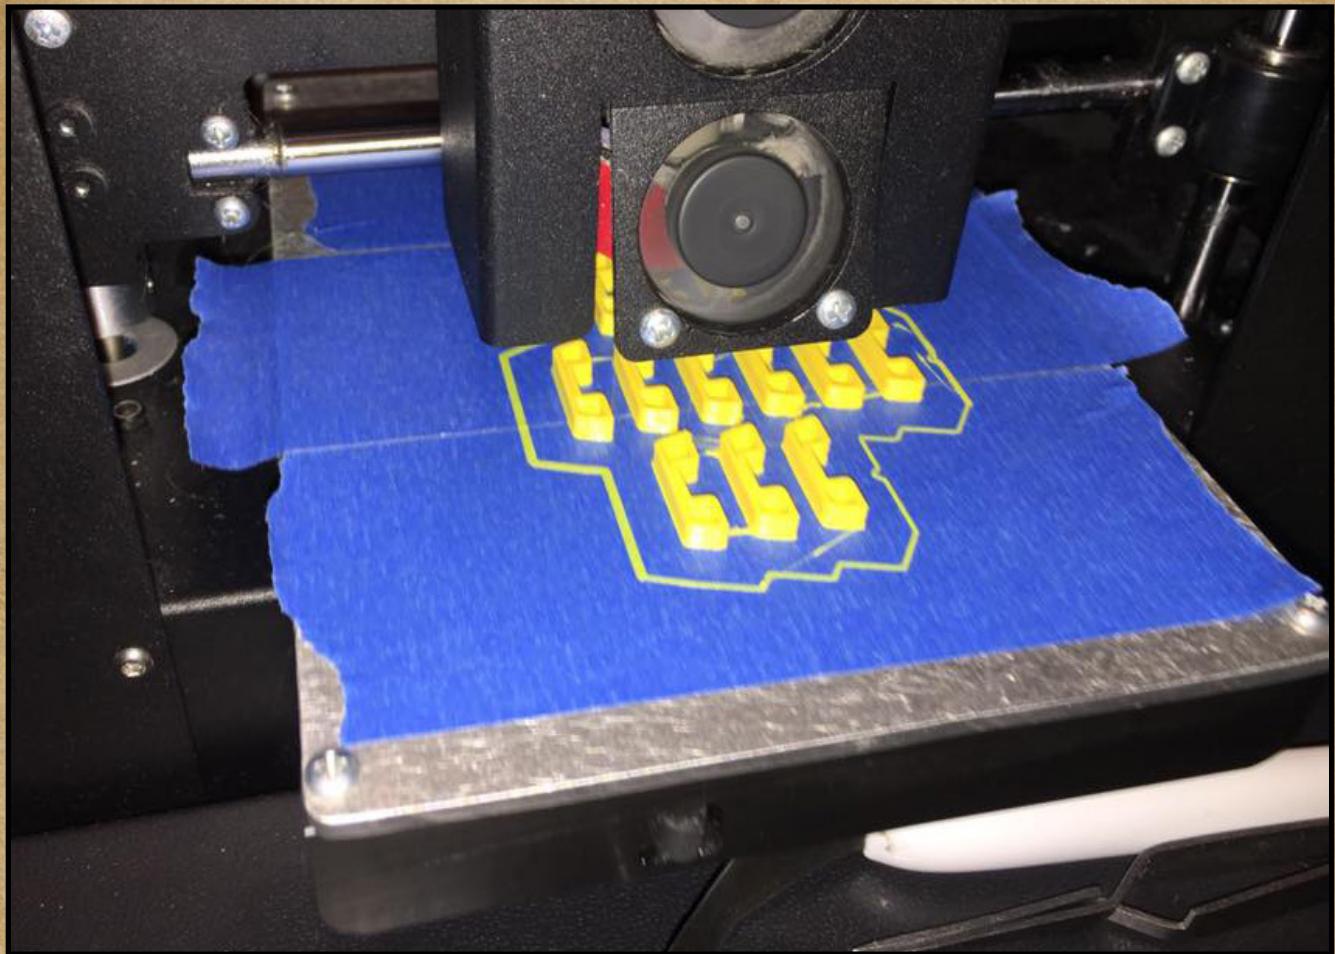

Dragonlock™ Clip v2.0

This newly designed clip is intended to replace the v1.x clips included in all Dragonlock™ terrain sets released up to August 2016. Clips are provided in three sizes, and we recommend printing one of each to see which one will work best with terrain pieces printed on your printer ('A' is the smallest, and 'C' is the largest, we suggest you try 'B' first.)

Print settings:

• 200 micron layer height (.2mm)
• 0% infill
• No rafts or brims
