

Thank you so much for your purchase of this model set. My name is [Will Walker](#) and I am a community creator for Fat Dragon Games Dragonbite system. I thank you so very much thinking my stuff is good enough for your game. I know how important my game is to me, so I know I appreciate it. Thank you also for helping me continue my work and encourage you to contact me at [rbdmwill@gmail.com](mailto:rbdmwill@gmail.com) with any and all concerns you might have with these tiles or any other matter.

I always need to mention my good friends Aaron Mulder and Colin Christenson. Aaron designed and built the amazing <http://dungeonprint.com> studio which allows you to design, organize, and create maps with limitless options. [Colin Christenson](#) is my friend and peer who creates FDG Dragonbite Village terrain, and is responsible for virtually everything this community has requested for city gaming. My work wouldn't be the same without them. By our powers combined, we **are** the magic.

For this set you'll want to make note of the following special instructions:

BuddyC Top - Print with Supports, 15% or more infill

BuddyC Bottom - Supports optional (I printed mine with them), 10% infill

All other tiles 0% infill, supports. Or whatever you want. This is a READ ME, not a cop.

I'd like to extend a word of thanks to the following artists and designers who posted textures online under the very generous Creative Commons - Attribution Only license.
