

# MODEL INSTRUCTIONS

We recommend using Gorilla Glue (or similar super glue) to make these models.

Print all models at .1mm layer height, 10% infill. We suggest adding a brim for printing the generator pieces, and long single-piece gun barrels (but not the two-part top gun on the Austro Daimler Mk. I, or the top gun for the Kugelpanzer). When printing the small guns and generators, printing 4 at a time will allow each layer to fully harden on each model before the next layer is printed.

## KUGELPANZER

Note: The wheels are 'handed', with a left and right version. On each, the small vents should be at the top, and facing forward on each side.

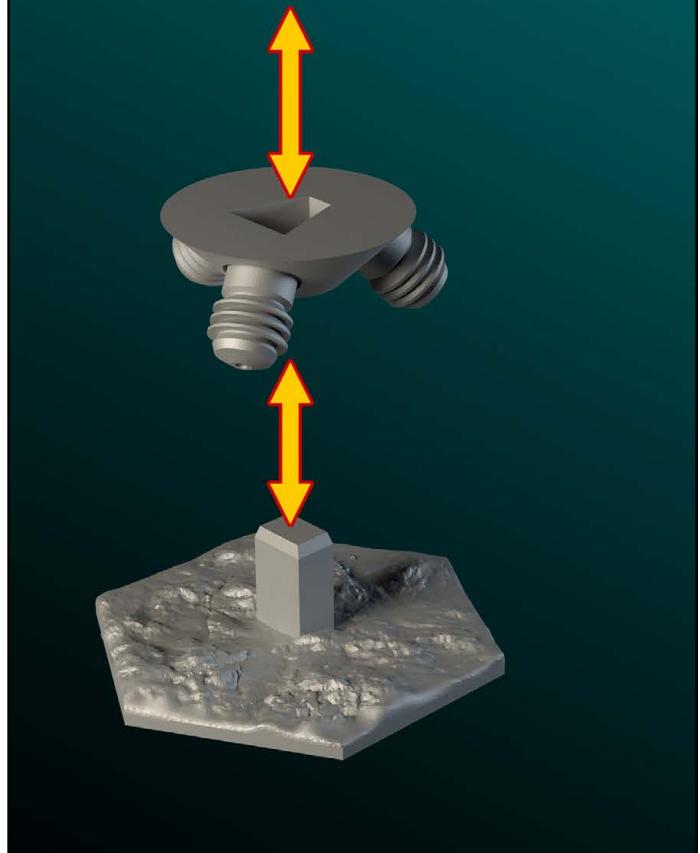

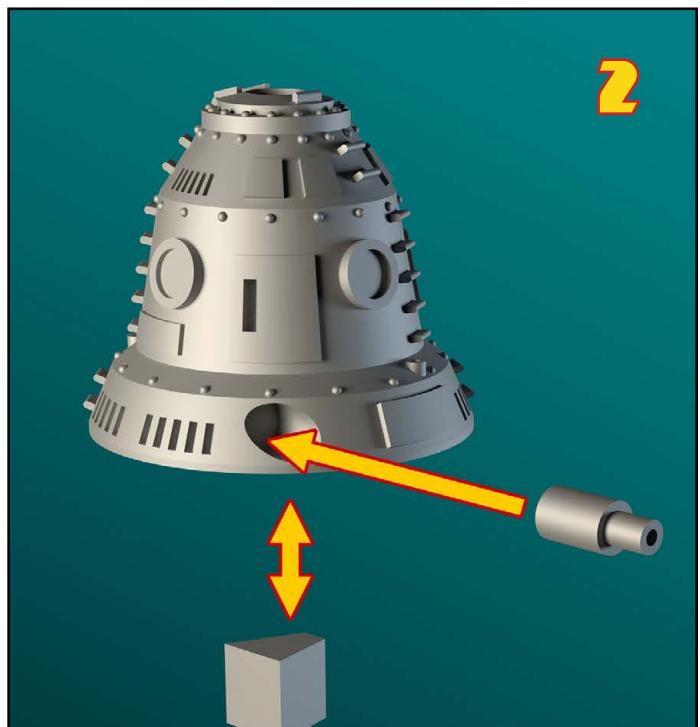

## CHENAULT MK. II

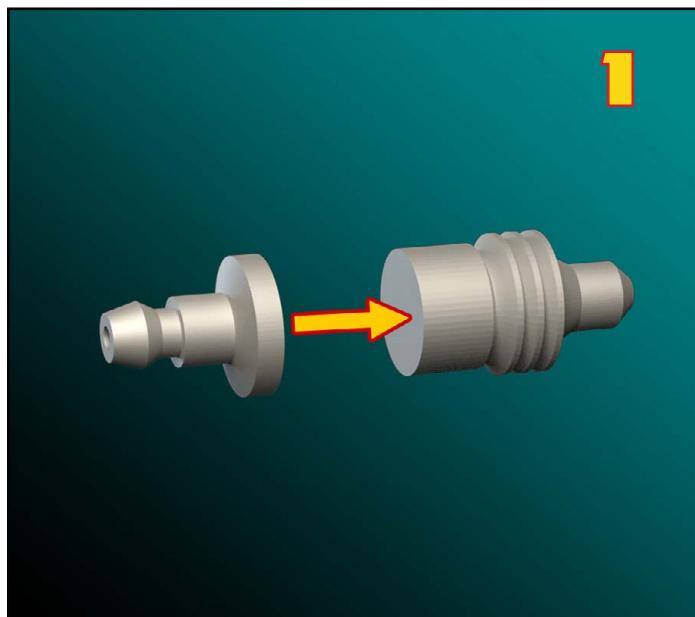

## LIBERTY BELL Mk. I

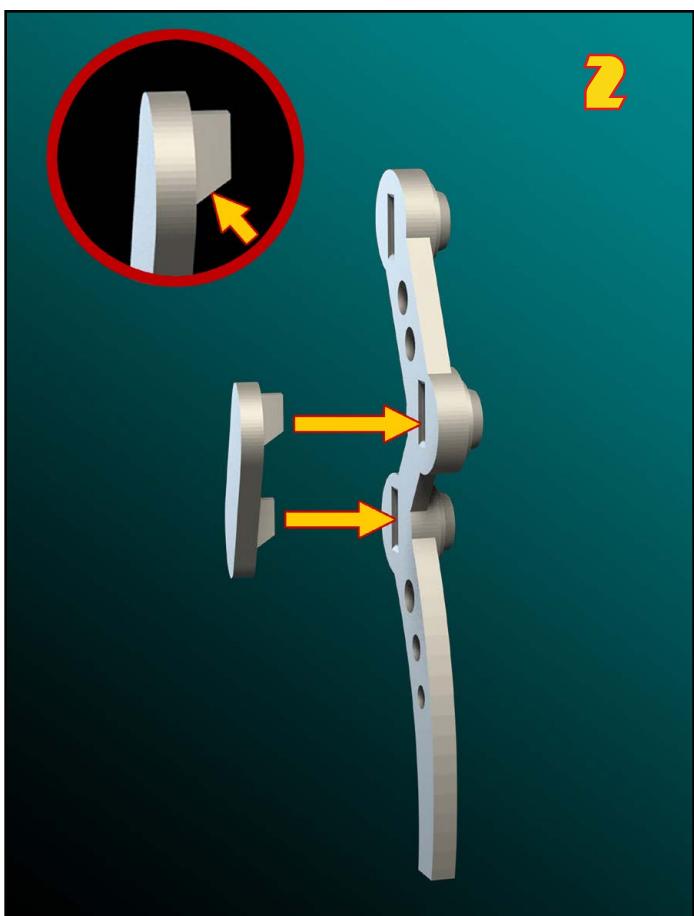

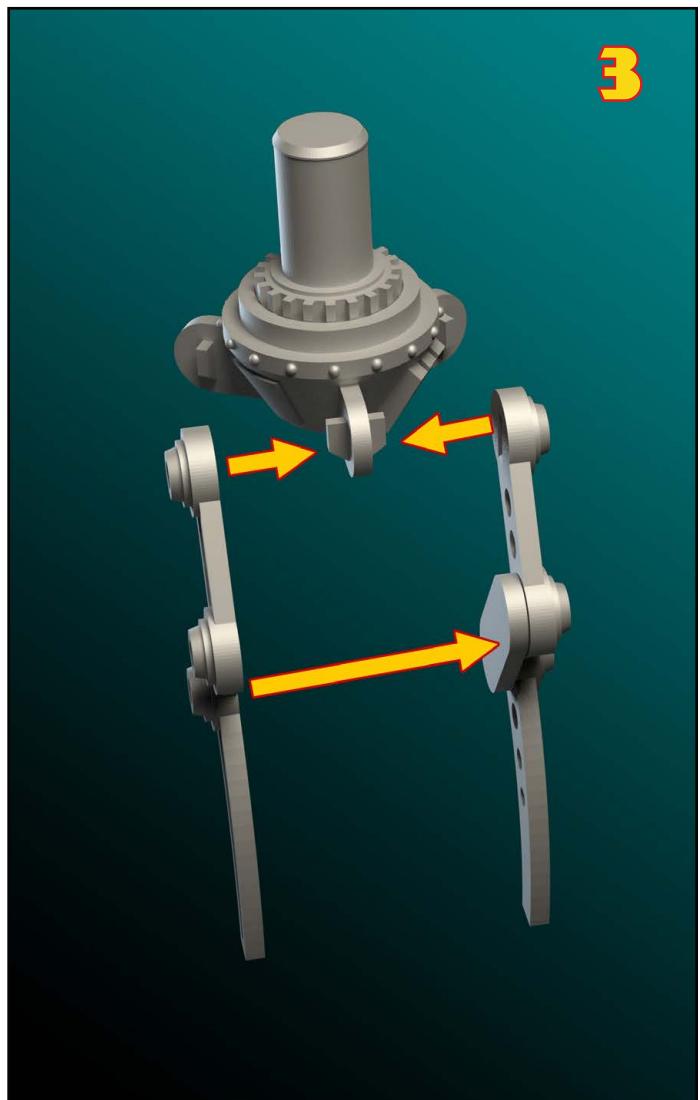

## AUSTRO-DAIMLER Mk. I

## STURMPANZER II A

Step 2: Note that the tabs have an angled edge on the LOWER SIDE. If the angled side of the tab is on the top, you have the part upside down.

## VICKERS Mk. IV

## TESLA TOWER
