

## Foreword:

Hi, my name is Antal Kéniger, a graphic artist from Central Europe. I'm the founder of Black Scrolls Games and I've been in the tabletop game business for seven years, working with other publishers and playing with friends on the weekend (when we all have time for it).

First of all, I would like to thank you for downloading/purchasing our products! I hope that this product will lead you through an interesting set of adventures and lend a little extra excitement to your game, whether gaming online (with my other products) or sitting around a table with your friends.

Have a great game!

# Hammerhead Shark Man

You can resize the files if you want a smaller (or larger) sized miniatures in your game, these files are good to 28-32mm miniatures without changes. The finished model will be 5.2cm high. Reduce the size with 20% to get a more accurate sized model for 28mm games (it will be harder to print on FDM printers). Use supports to the body, rotate the part to find the perfect position you desire for printing.

We have printed this models at 50-micron layer height, 10 percent infill and 195C with PLA, with a 0.2 mm nozzle. These numbers may vary based on your printer and the material you use.

If you have any questions, please feel free to contact us on Facebook or any other platform where you can find us. :)

These files are for personal use only, making any changes to the files, selling them or the printed result is possible only with the written permission of the publisher.

## Parts:

### HH Shark Man

You can mix these parts with other miniatures so you can get a new HH shark man :)

**Rotate and align the model to find the best angle to print it with support. Use brim around the object.**

**I printed him rotated back by 60°**
