Miniature Set

by Antal Kéninger

## Foreword:

Hi, my name is Antal Kéninger, a graphic artist from Central Europe. I'm the founder of Black Scrolls Games and I've been in the tabletop game business for seven years, working with other publishers and playing with friends on the weekend (when we all have time for it).

First of all, I would like to thank you for downloading/purchasing our products! I hope that this product will lead you through an interesting set of adventures and lend a little extra excitement to your game, whether gaming online (with my other products) or sitting around a table with your friends.

Have a great game!

A handwritten signature in blue ink that reads "Antal Kéninger".

## The Harpy

You can resize the files if you want a smaller (or larger) sized miniatures in your game, these files are good to 28-32mm miniatures without changes. The finished model with the base and wings will be 10 cm high. Reduce the size with 10% to get a more accurate sized model (it will be harder to print on FDM printers). Use supports to the body and wings parts, rotate the parts to find the perfect position you desire for printing.

We have printed this models at 100 (wings and base) and 50 (body) micron layer height, 15 percent infill and 195C with PLA, with a 0.2 mm nozzle. These numbers may vary based on your printer and the material you use.

If you have any questions, please feel free to contact us on Facebook or any other platform where you can find us. :)

## Parts:

**Sitting**

**Attacking**

**You can print out the bases without supports.**

**Rotate and align the other parts to find the best angle to print them with support. Use brim around the objects.**

**You can set the overhang angle to 70 at this piece to print it with less supports and make it easily removable.**
