May 2014

***Game Masters need quality maps for their miniatures. DramaScape is committed to bringing Game Masters the maps they need.  
This product is a set of 3D Crates and Containers.***

The first three pages are cargo containers with a rectangular shape.

The first one is a blue container labeled CARGO in white lettering covered with rust on all sides. The container is useful as a rail freight container.

The second one is a green container with some rust on two of the sides. The container is useful as a truck freight container.

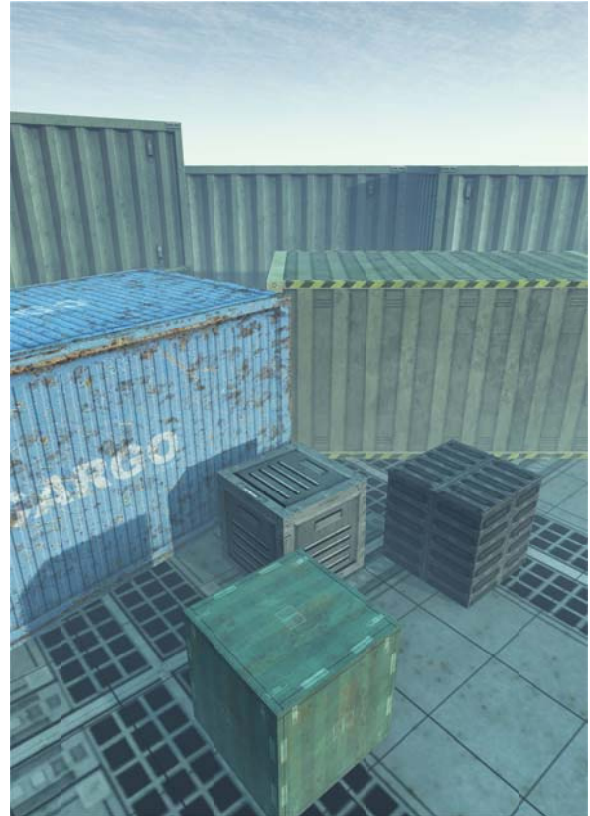

The third one is an olive green container with yellow and black stripes. The colors used give the container a military feel.

The last three pages are cargo boxes with a square shape.

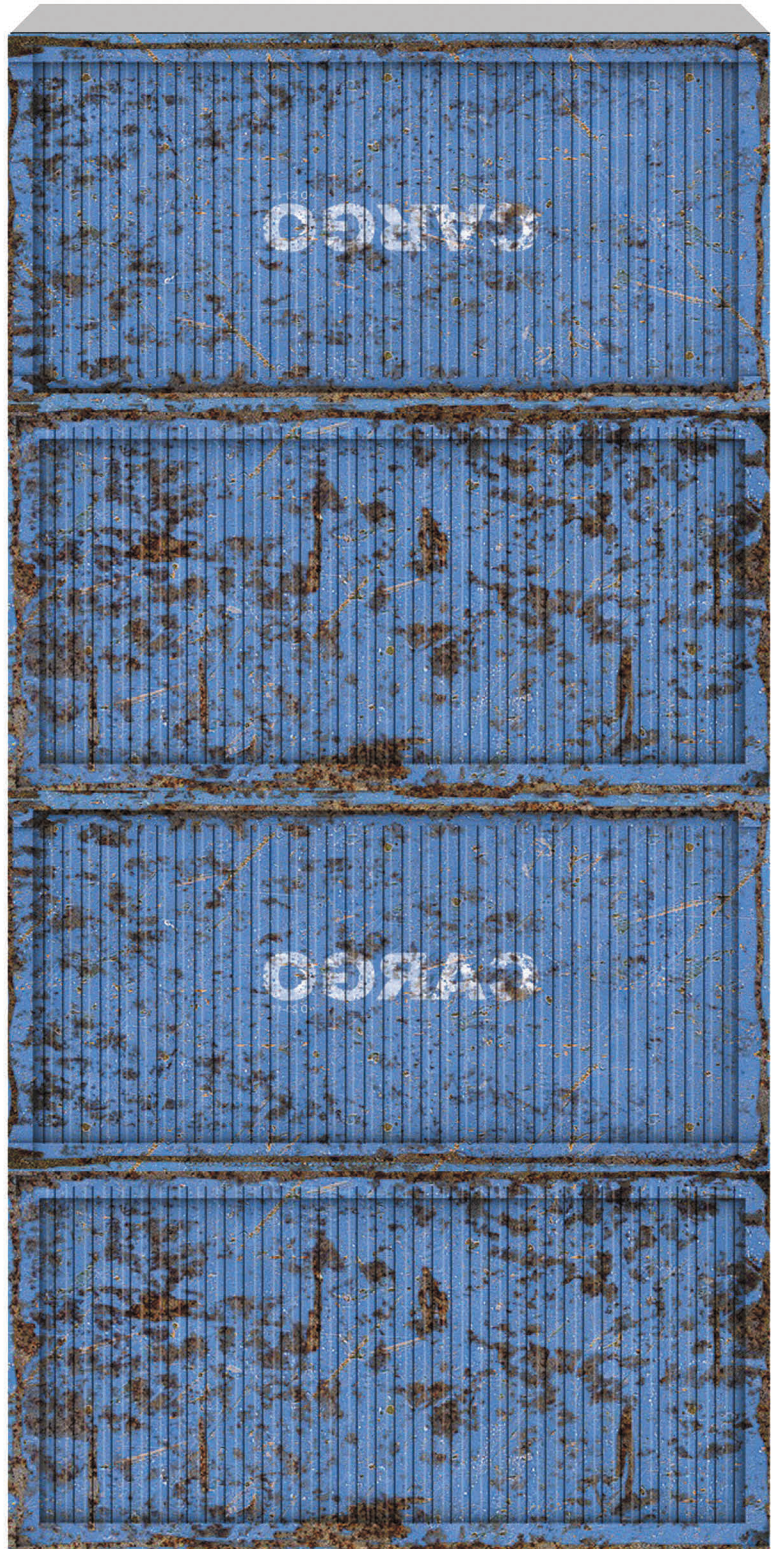

The first one is a gray box with darker rectangles inside in two columns. This gives the box a futuristic look, but also a grated appearance that makes it look like a jail cell.

The second one is a green box with yellow and black striping with rust accumulating on all sides.

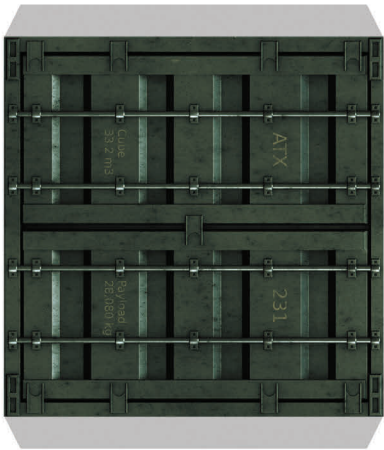

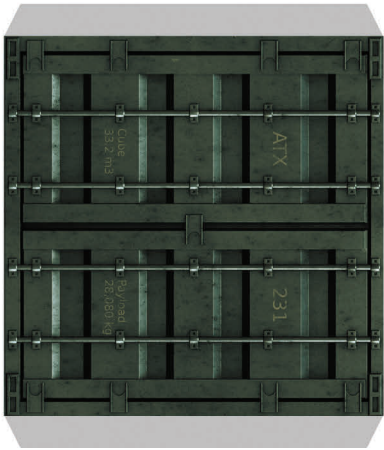

The third one is a silver box with the top and bottom of the box having two diagonal, one horizontal, and one vertical bar and the other four sides have four lines and a rectangular indent.

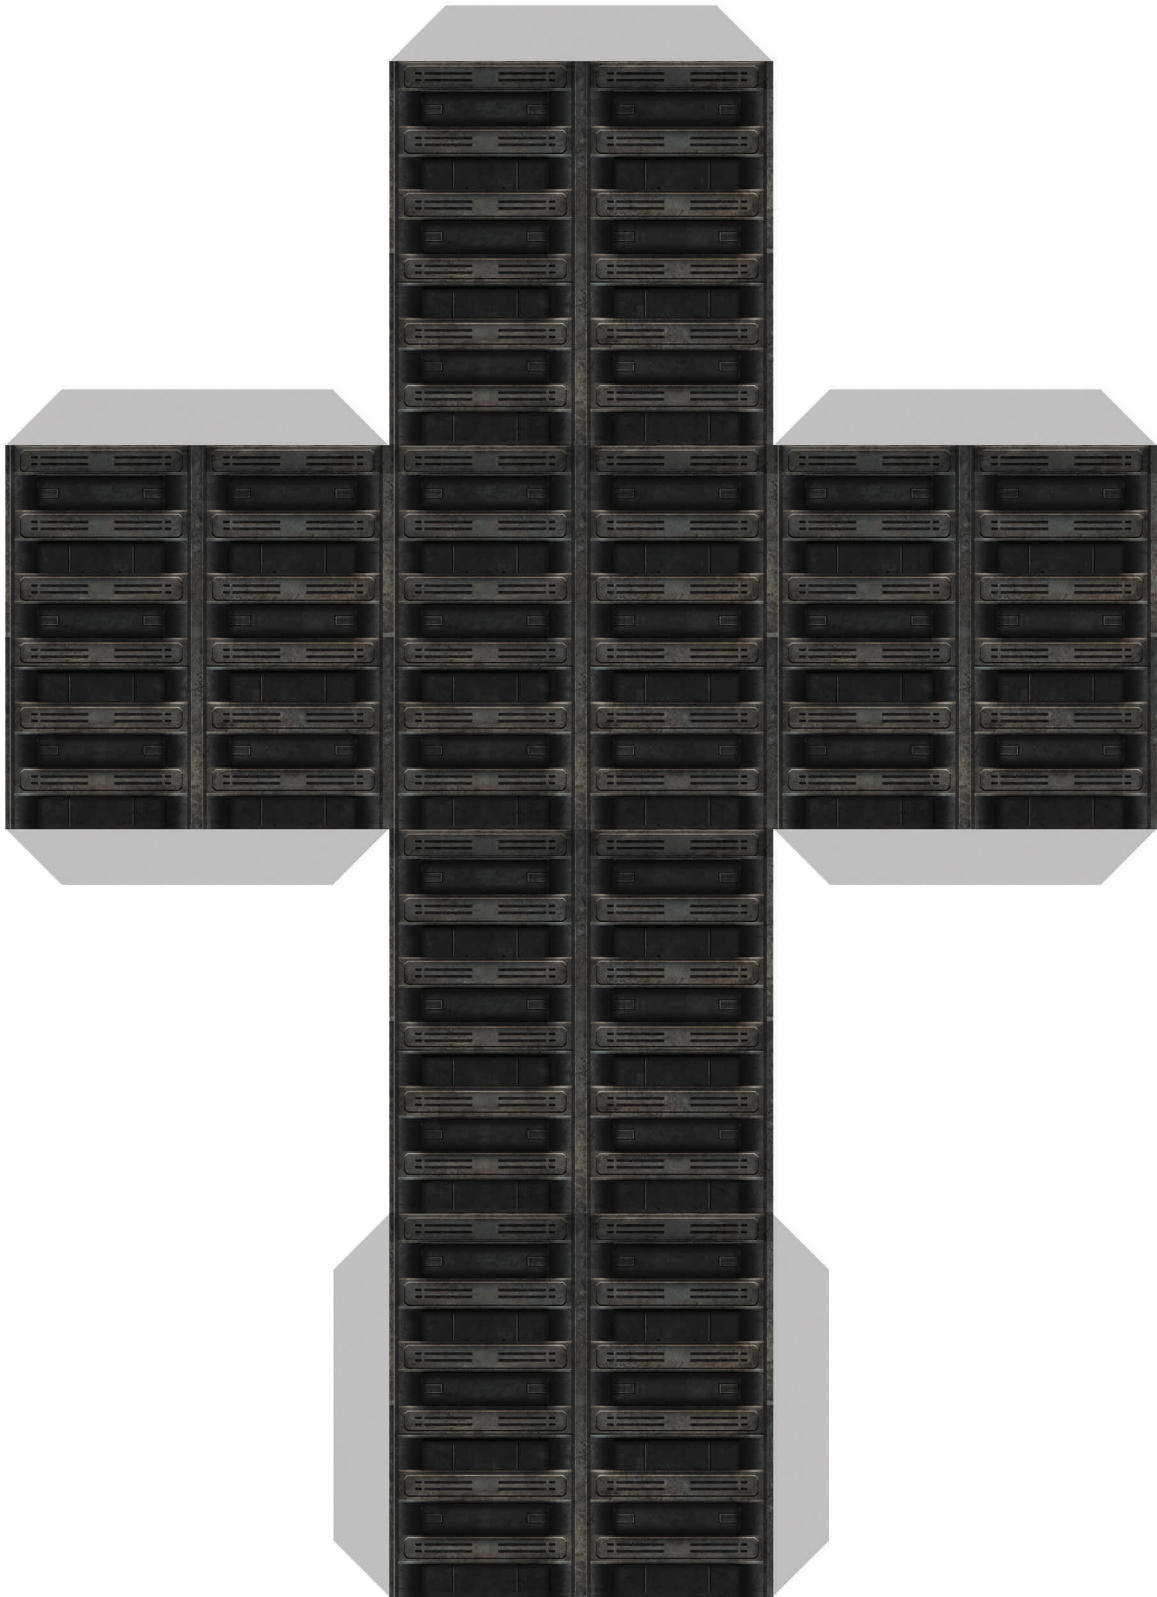

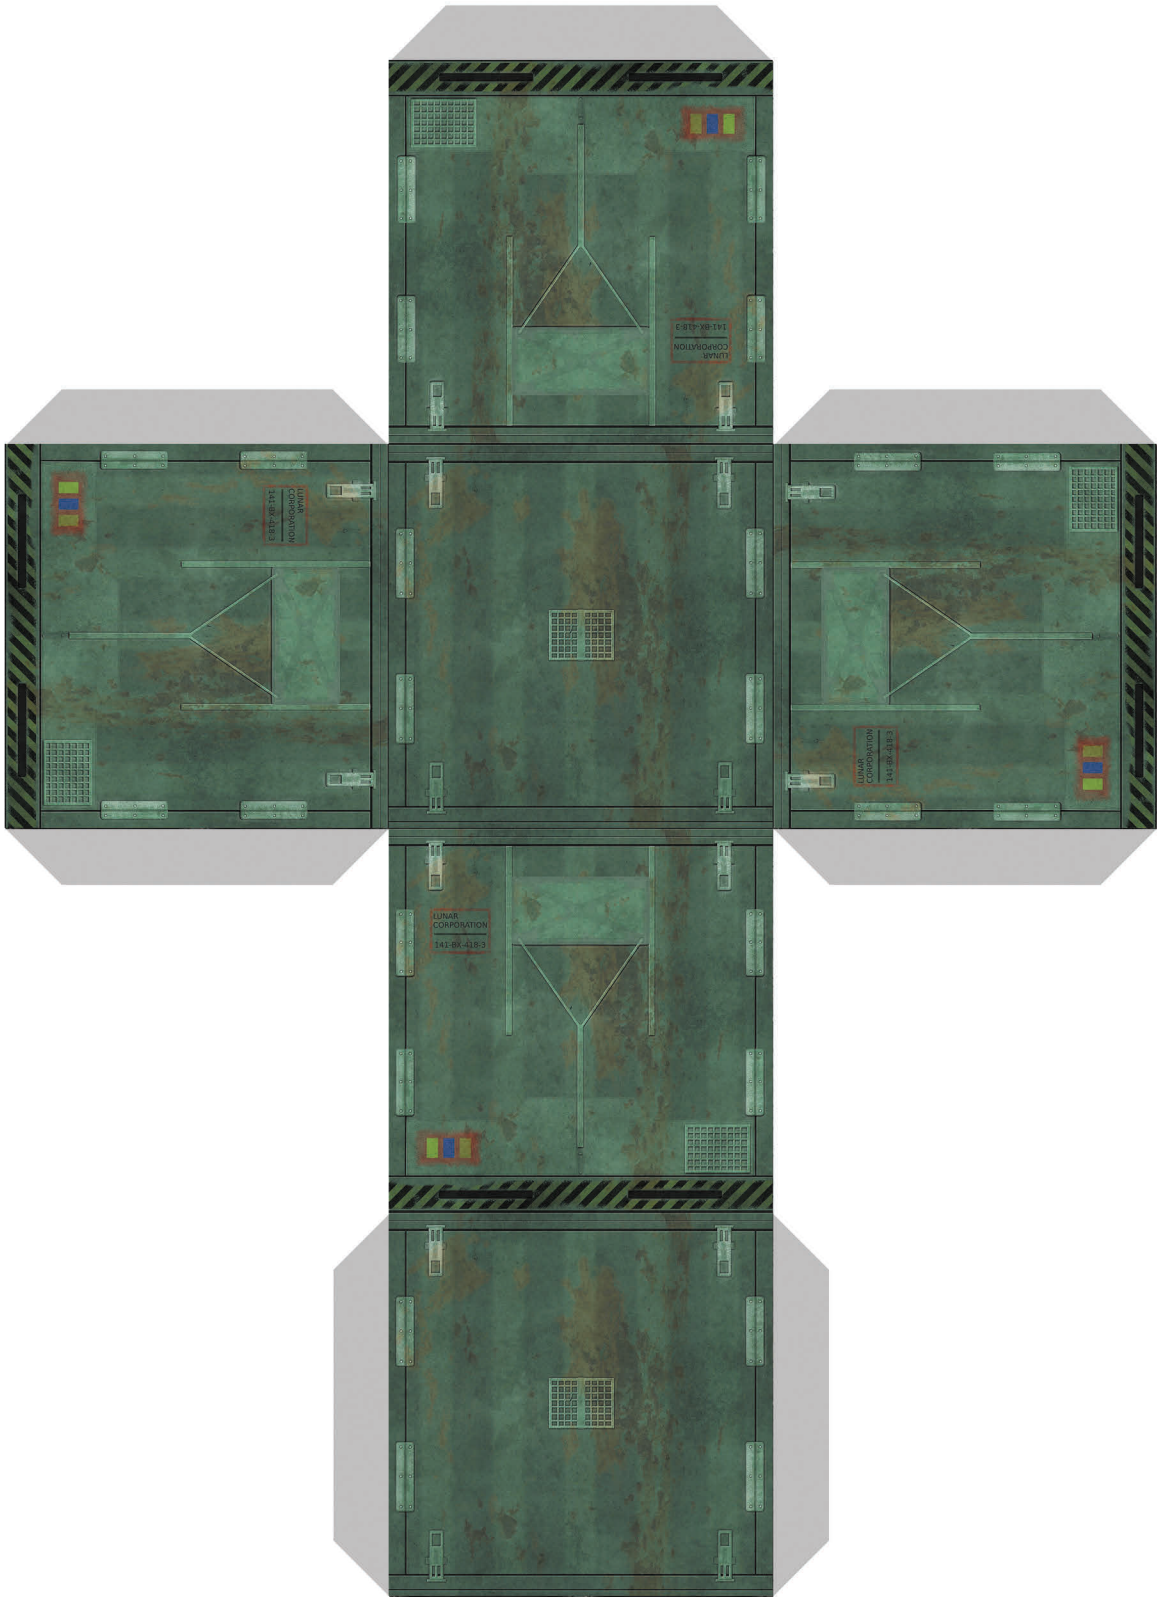

**Game Masters need quality maps for their miniatures. DramaScape is committed to bringing Game Masters the maps they need.**

**DramaScape map products are designed to be compatible with both square and hex-based games and VTT products.**

**“Hey who cluttered up the Repair Bay with all these crates and containers! Get them out of here and into storage!”**

**Crates and Containers include three crate boxes and three cargo containers as 3d objects. These are intended for printing out, folding, and gluing together to create 3d boxes and rectangular containers. Removing one of the six sides allows people to view inside, which is excellent if you have any props of items that could be stored in the containers.**

**Crates and Containers are intended for use in modern, and near or far future science fiction games.**

**Crates and Containers are a great addition to our Repair Bay map changing the area into more of a supply or cargo bay instead. The product is also a good fit for our Modern Warehouse map as additional cargo crates and containers.**
