

E-Z DUNGEONS

EXPANSION SET 8

DUNGEON PROPS

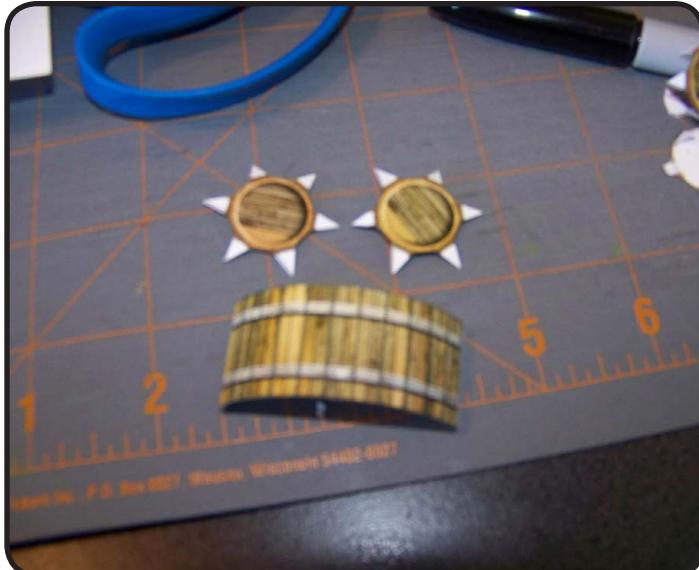

Before proceeding with this document, make sure you have read the beginners guide to card modeling included with this model set!

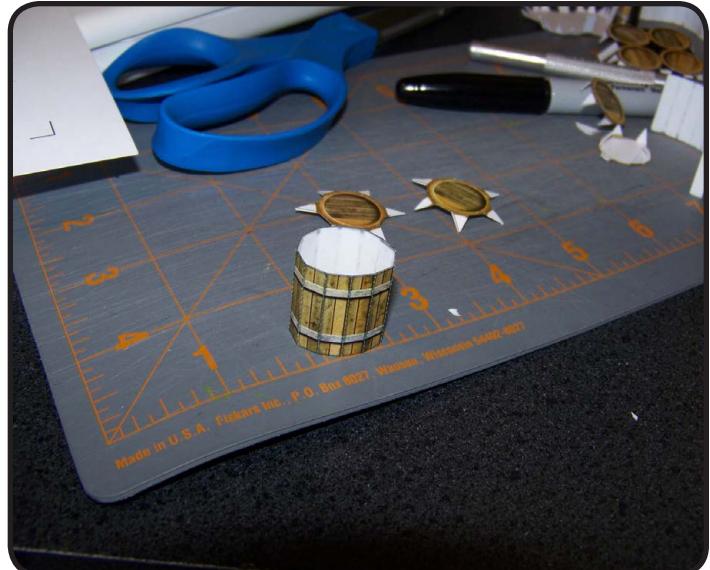

FAT DRAGON GAMES

E-Z DUNGEONS

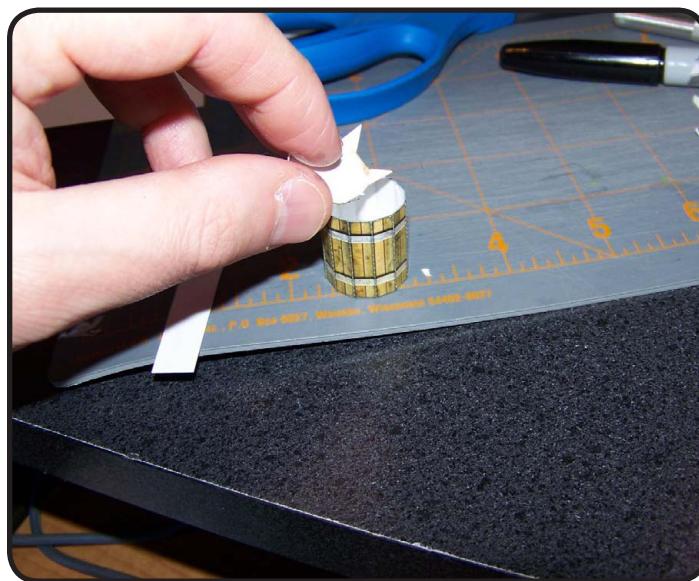

Single barrel

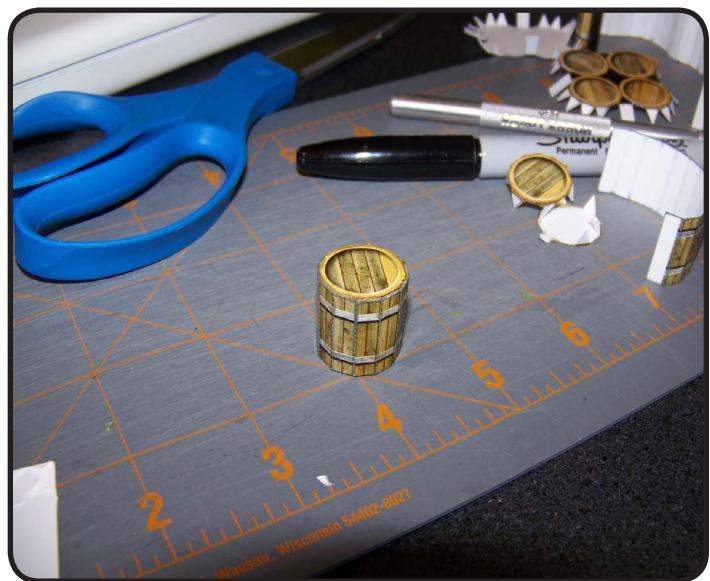

1: Cut, score and test fold the single barrel pieces as shown.

2: Glue the side wall piece as shown.

3: Turn upside down and place on your desk. Insert the piece that will be the top of the barrel through the bottom and push down gluing into place. You do this upside down so you can make sure the piece glues flush with the top edge of the side walls doe a perfect fit.

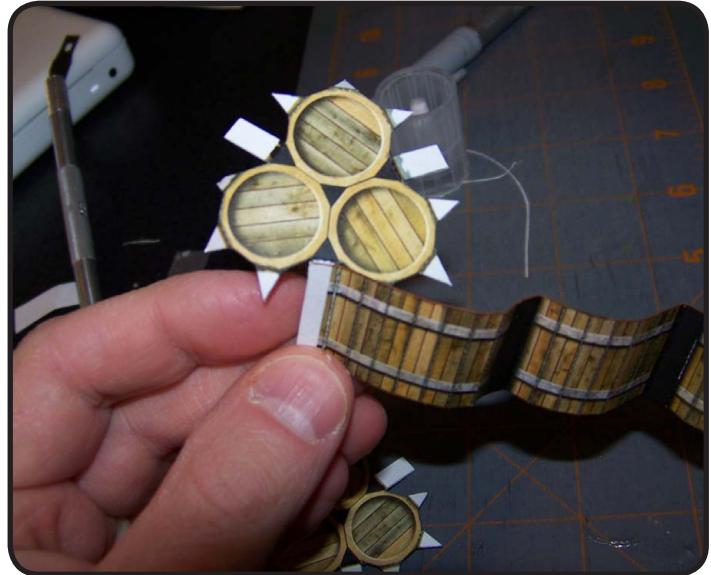

4: Finish by gluing the bottom piece.

E-Z DUNGEONS

Multi-barrels

1: Cut, score and test fold the multi-barrel model (both 3 and 4 barrel versions assemble the exact same way.)

2: Begin by gluing the white edged end of the side wall to the top piece as shown above.

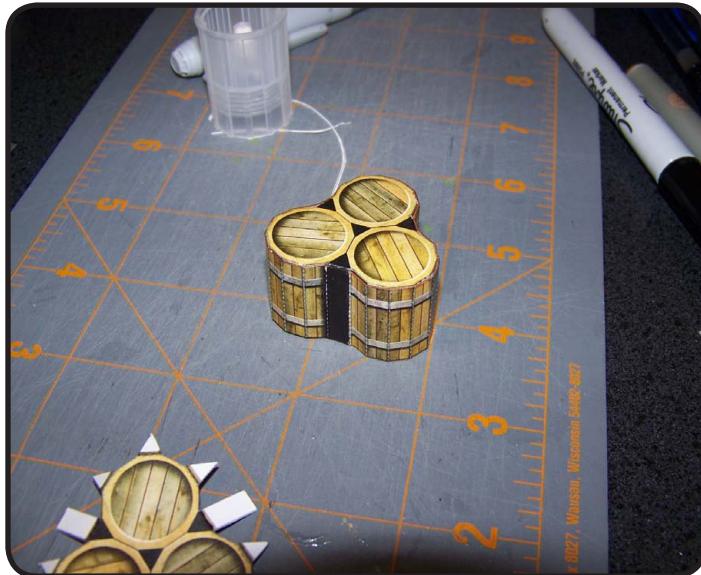

3: Continue gluing the side wall a tab at a time.

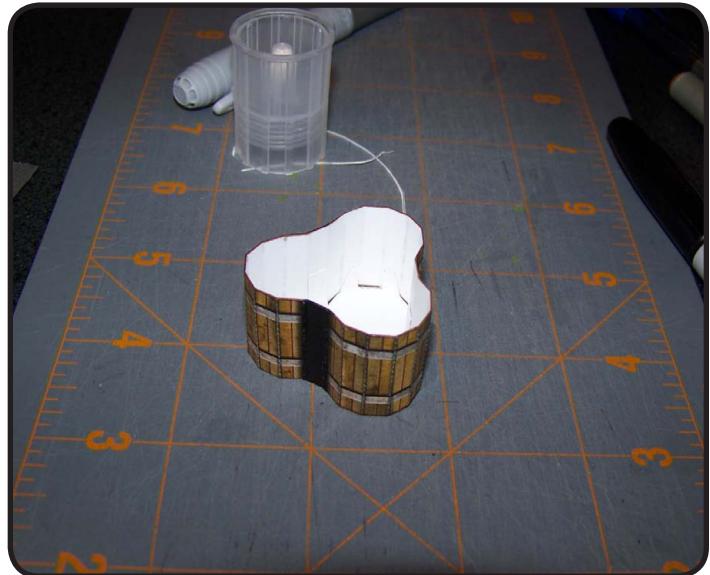

4: Continue around the perimeter of the barrel until you get to the place you started.

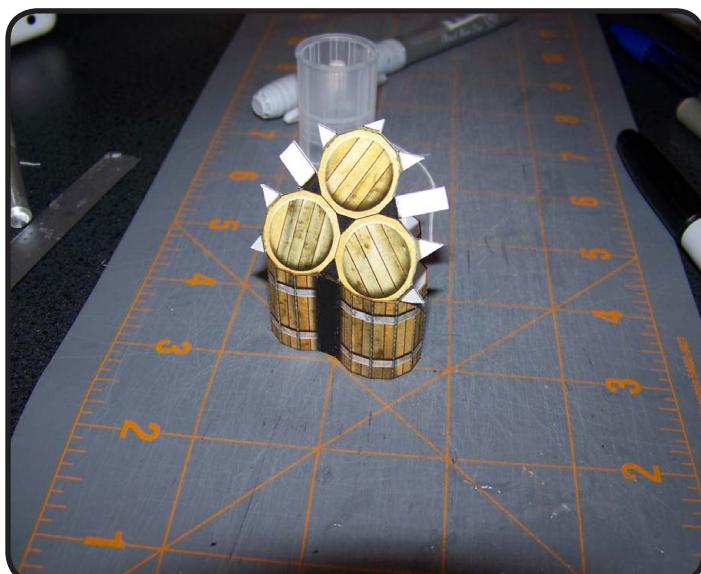

E-Z DUNGEONS

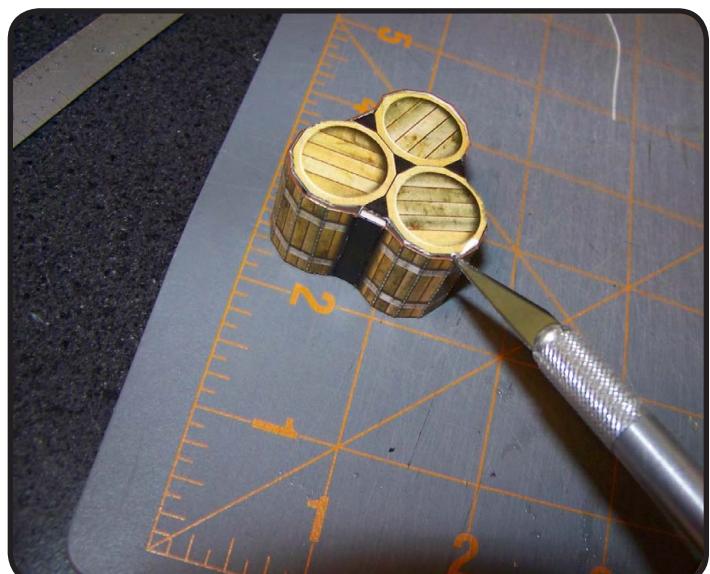

5: Finish by gluing the last end over the white end you started with.

6: Flip over and check the tabs from the inside, re-glue any if required.

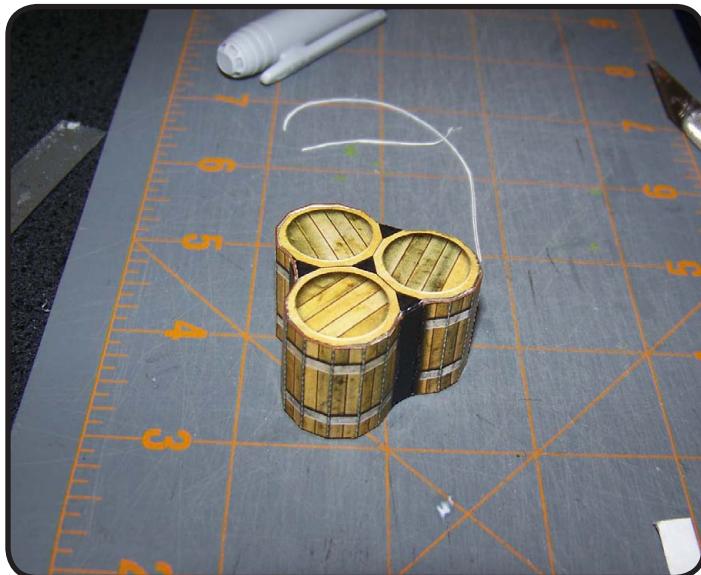

7: Begin gluing the bottom piece by attaching a single large tab and allowing to dry.

8: When gluing the remaining tabs, if the piece gets shoved too far into the walls just use a hobby knife or other small instrument to pry it back up.

E-Z DUNGEONS

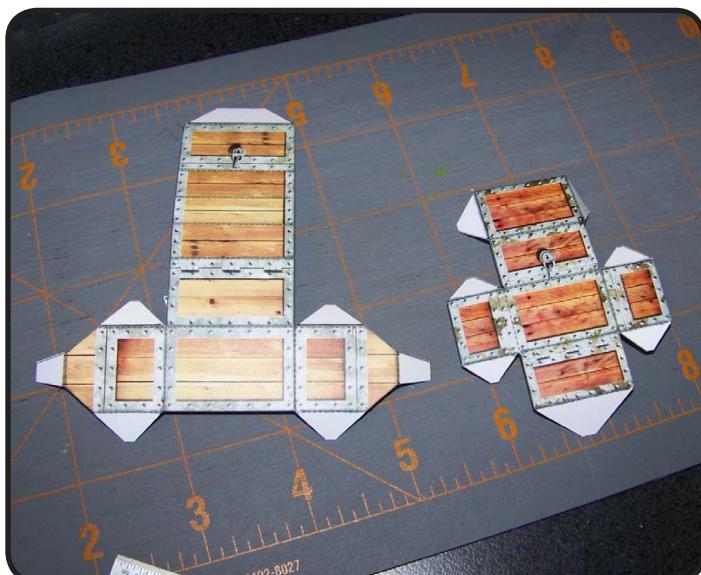

9: The finished multi-barrel

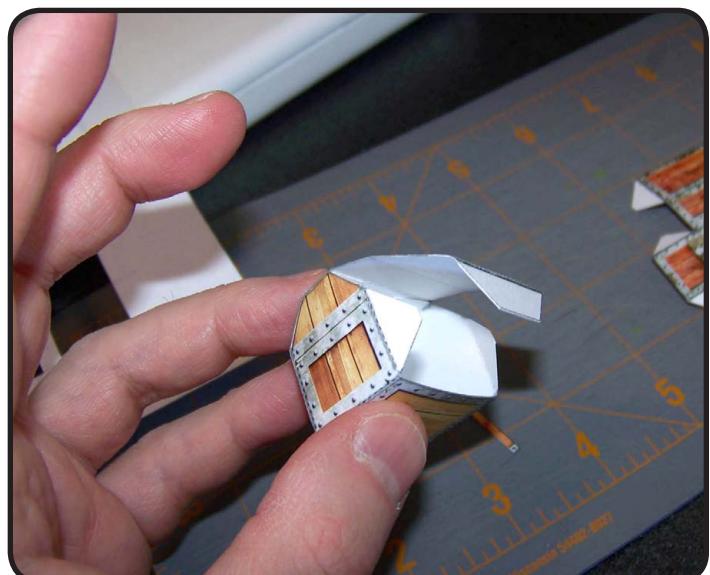

10: Finished single, triple and quadruple barrels.

Chests & Crates

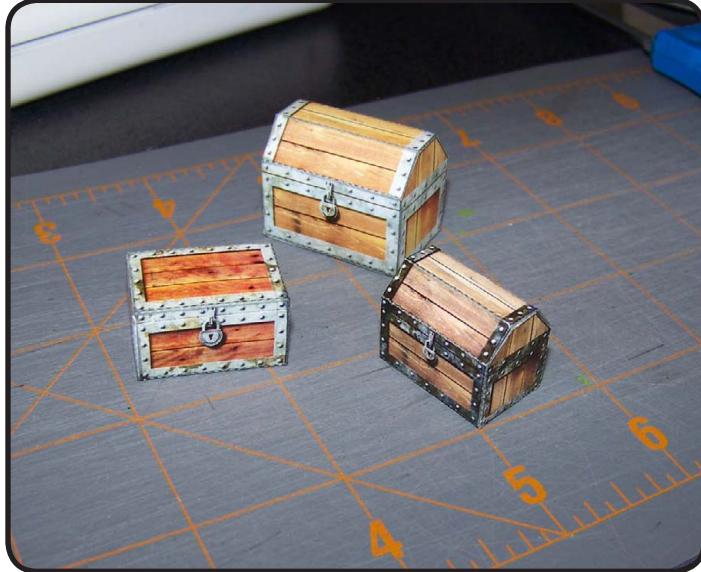

1: Cut, score and test fold the chest pieces as shown.

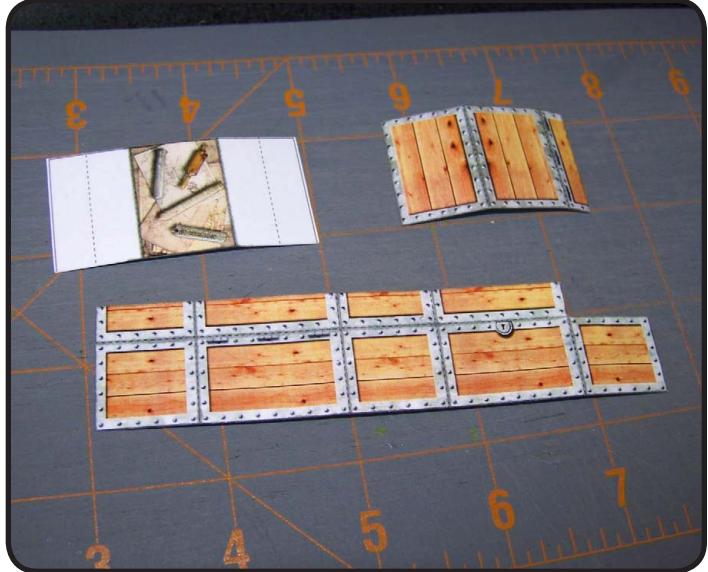

2: Begin gluing a single set of tabs at a time.

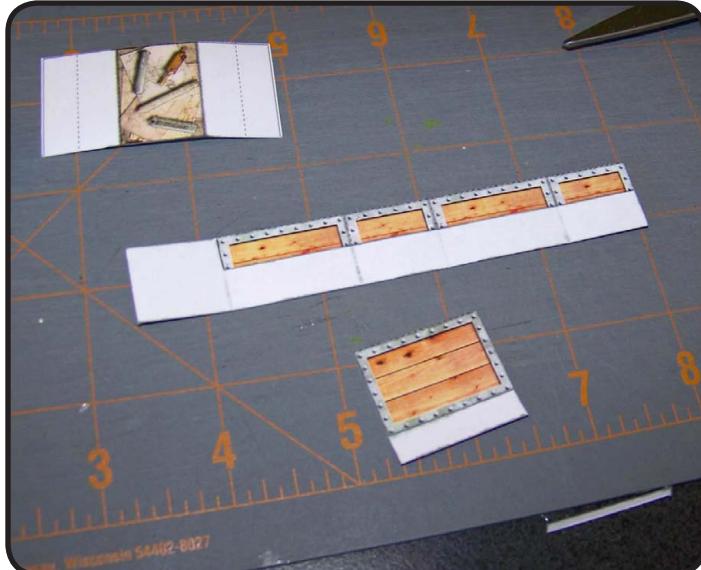

E-Z DUNGEONS

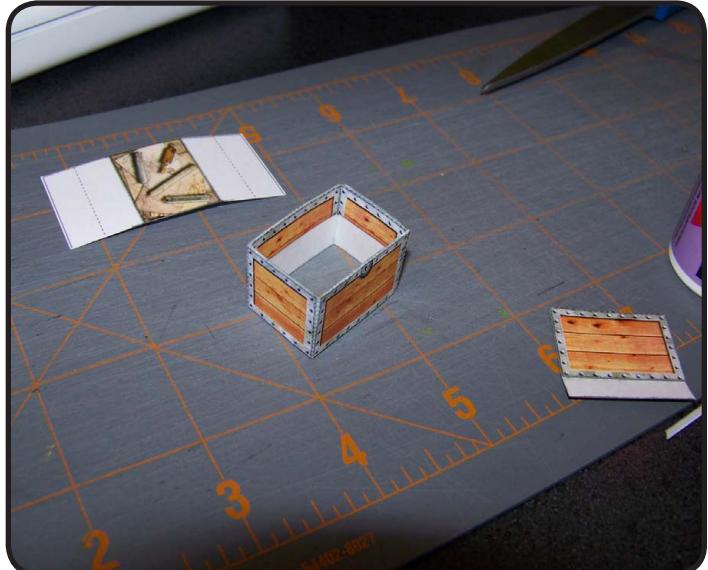

3: Finished chests (closed versions.)

4: The open chests and crates are not any harder to construct than closed versions. The only difference between them is the crate lid does not glue to the side walls. Cut, score and test fold the pieces as depicted above.

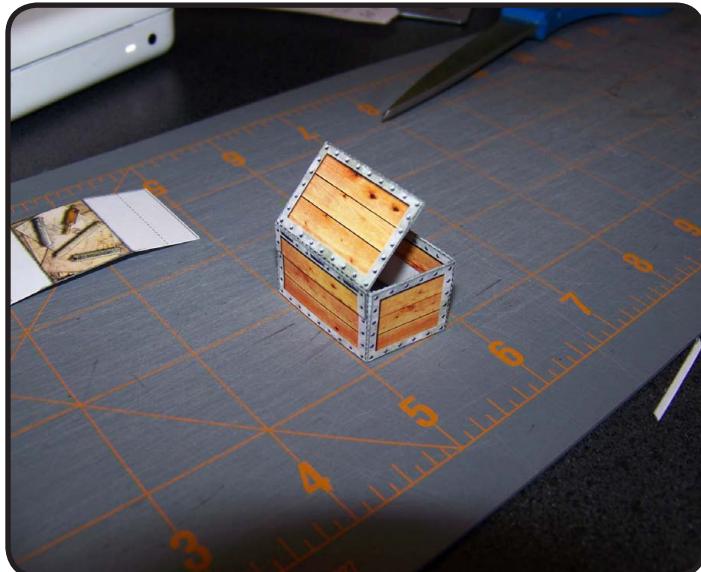

5: Fold over and glue the inside flap of the side walls and the lid in half as shown.

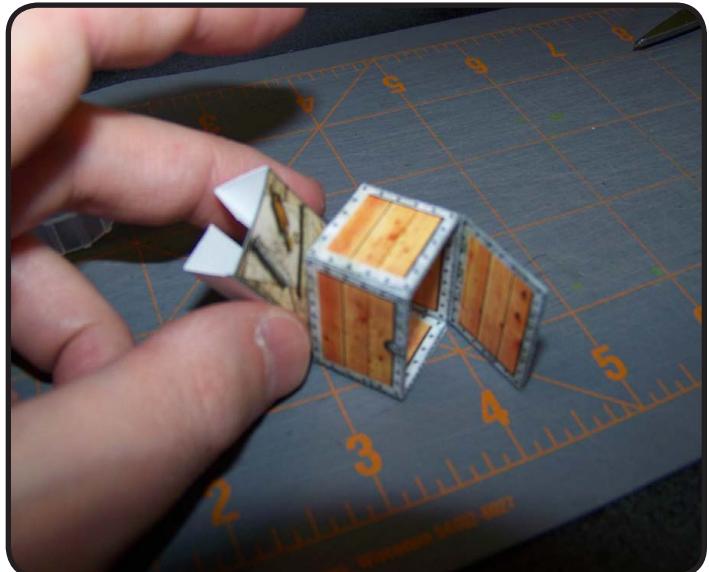

6: Glue the ends of the side walls together.

FAT DRAGON GAMES

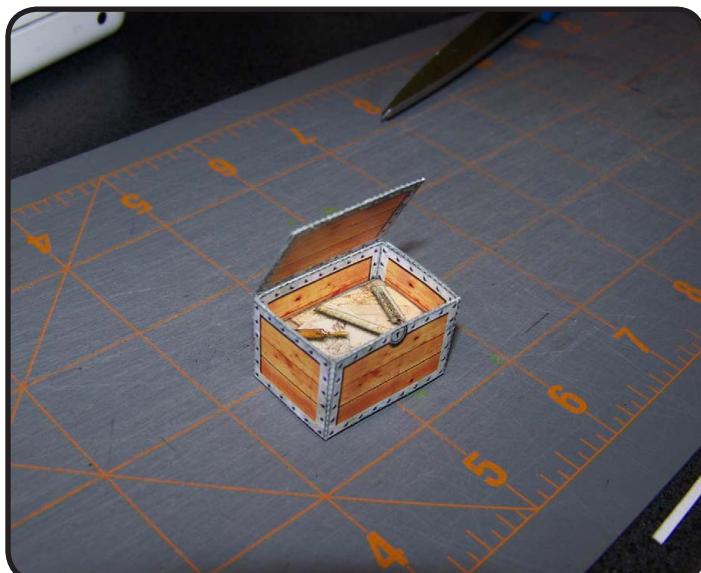

E-Z DUNGEONS

7: Glue the lid to the rear of the chest.

8: The interior piece simply inserts through the bottom (do not glue so you can swap out with other interior pieces.)

9: The finished open chest.
