

E-Z DUNGEONS

Before reading this instruction PDF make sure you have read the E-Z Instructions PDF first. Complete basic card model directions, suggested supplies, tips and tricks are outlined in that PDF. All E-Z DUNGEONS and E-Z DUNGEONS: Necropolis model sets are fully compatable (in fact, we strongly recommend you own the E-Z DUNGEONS: Basic Set to expand your Necropolis sets for added versatility and enjoyment.

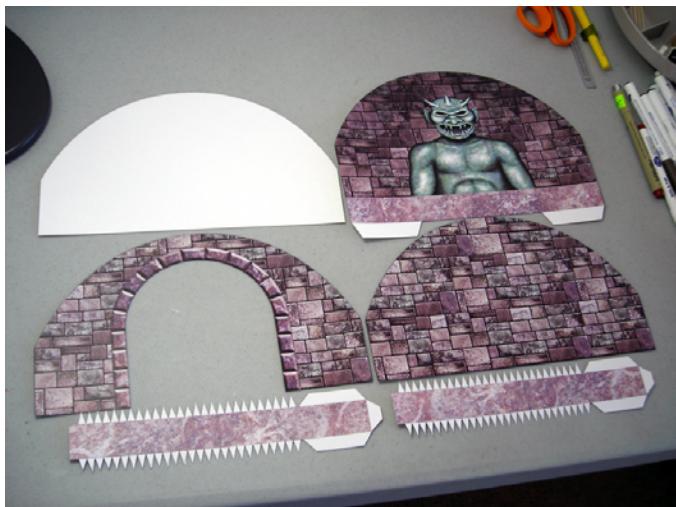

DISCLAIMER: Fat Dragon Games urges our customers to exercise extreme caution when cutting cardstock-Hobby knives (should you use them) are extremely sharp and must be used with the utmost care and caution and should never be used by children. Fat Dragon Games is not liable for misuse or accidents.

While most of the models included with this set can be built with the techniques outlined in the E-Z Instructions PDF, the temple back wall and idol require special techniques described on the following pages.

FAT DRAGON GAMES
Making Fantasy Fantastic

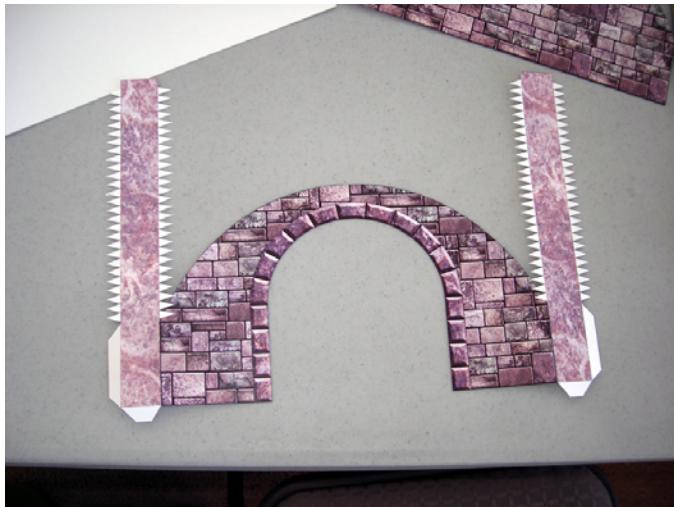

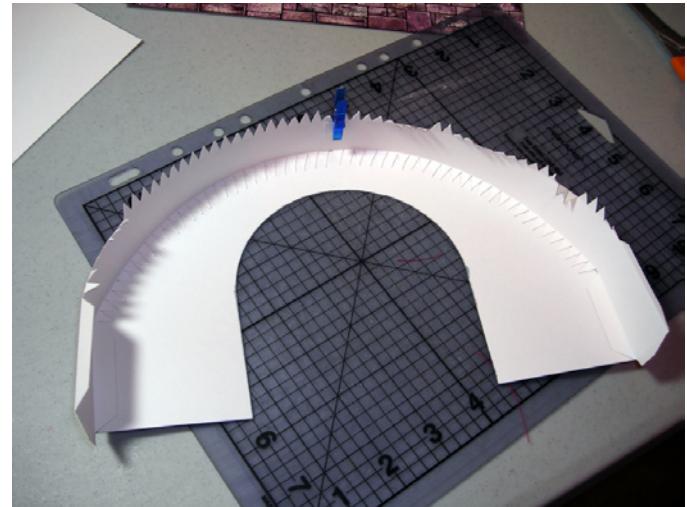

1: Cut and score all temple wall pieces.

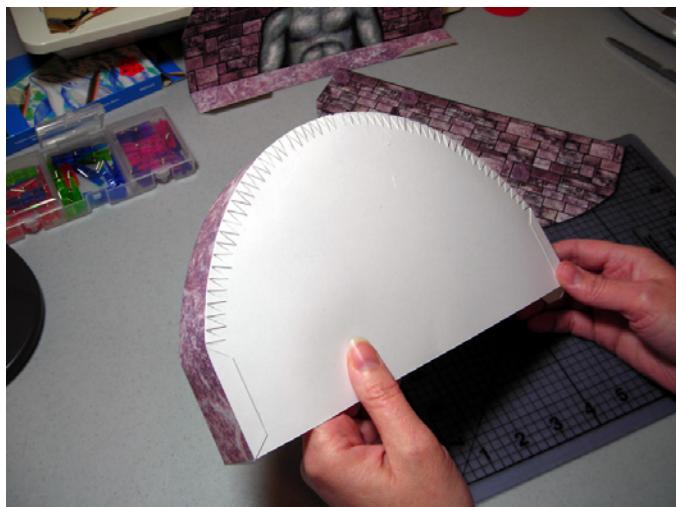

2: Glue the side strips to either side of the front wall piece.

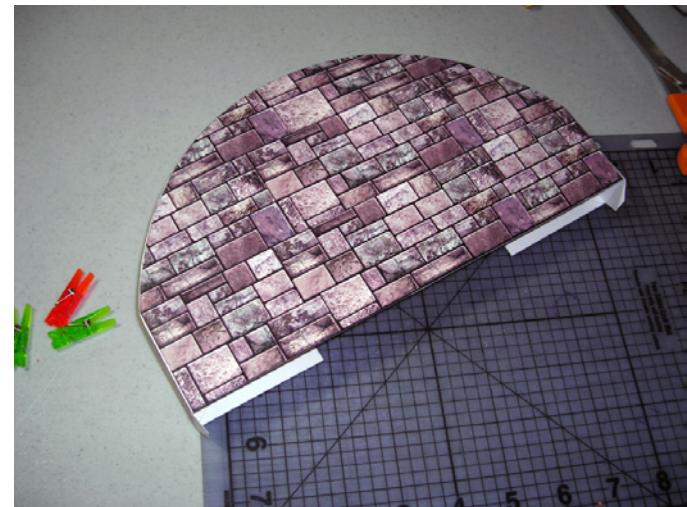

3: Allow the side strips to fully dry before proceeding to step 4.

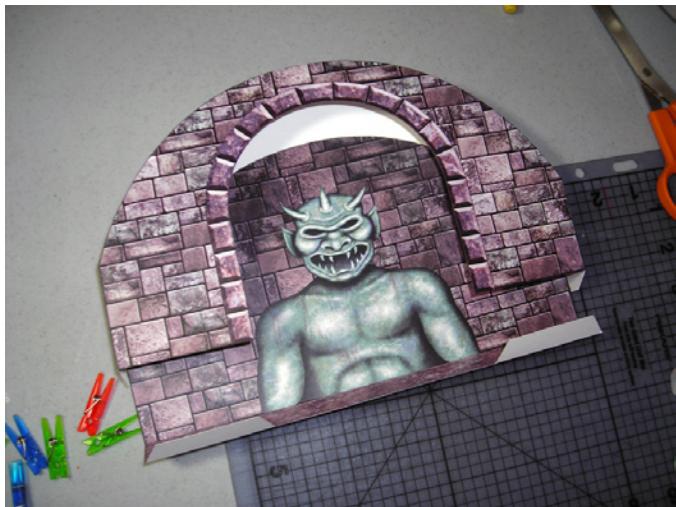

4: Slowly begin gluing the side strips around the circumference of the front wall upper edge. Work slowly, gluing just a few tabs at a time.

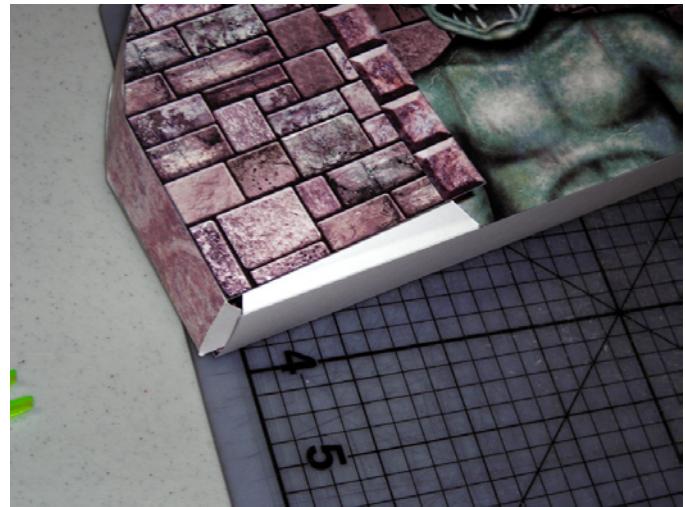

5: Once the side are completely glued to the front wall section, glue the rear facing tabs to the blank wall piece working a few tabs at a time.

6: Glue the rear wall piece in place.

7: After the outer wall model has dried, insert the interior idol section and glue it to the inner blank wall piece.

8: Make sure the tabs align as shown above before gluing.

Once your main temple wall is finished all of the other models can be constructed per the basic E-Z Instructions. You can make your temple as large as you like. If you desire a more complex design model pieces from the E-Z DUNGEONS Basic Set can be used to easily expand this set. All textures are pre-matched to ensure 100% compatibility. Below is a sample layout using just the models included in this set (color coded floor diagram on next page depicts layout using separate wall models, each with its own floor section.) All wall pieces can instead be glued to a master floor piece constructed from the full page floor sections provided should you wish a permanent model of your temple.
