**PRINT ON 65 lb.
CARD FOR
BEST
RESULTS.**
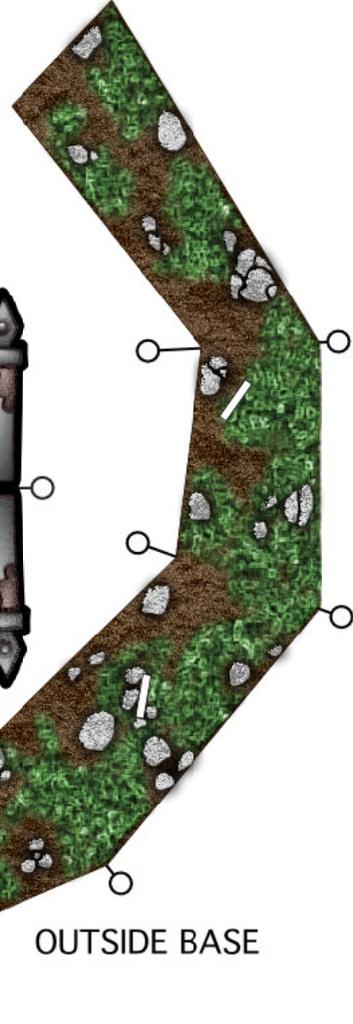

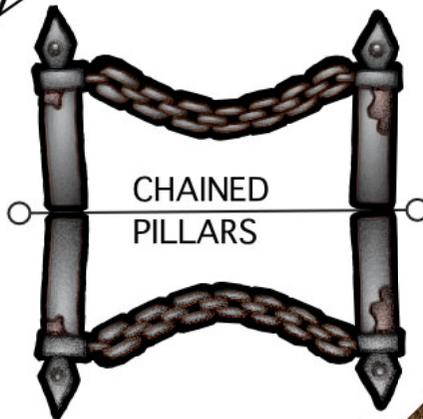

Score across all of
the lines marked with
the circled ends.

Score all of the lines
BEFORE cutting out
the parts.

Cut out the slots for
the tombstone and
chained pillars.

Score all of the tabs
around the Bottom
Base.

Body notes:
Do NOT score the side tabs of the Body segments.

Only score the bottom tabs.

When cutting out, pay careful attention to the faintcut lines in the center of the body segments. Also cut the small faint marks on the top of each segment.
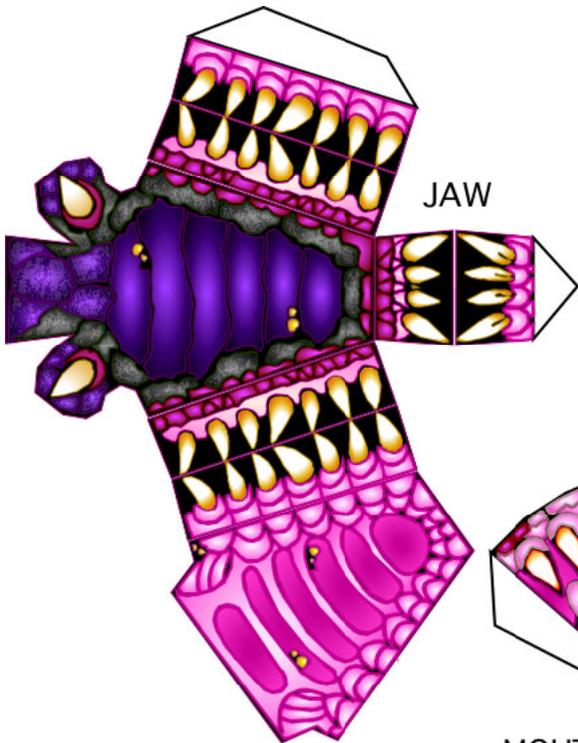

When gluing the body segments, do not precurve the parts, they will curve naturally after they have been glued.

When gluing each body segment over the lower segment always glue the inside mostarea. Then glue the rest of the segment from the inside of the body part.

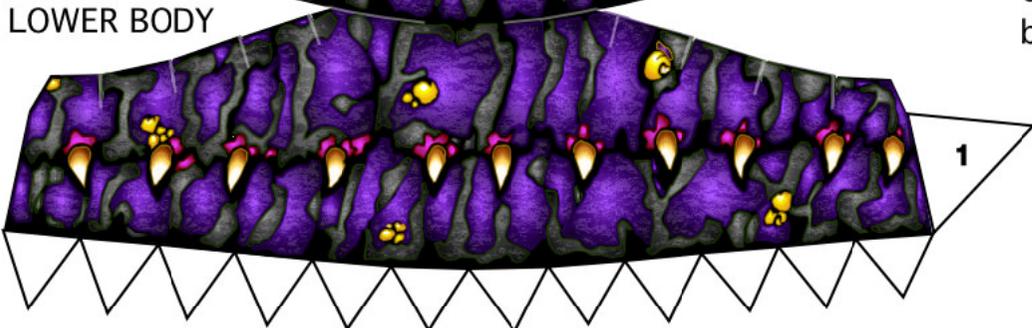

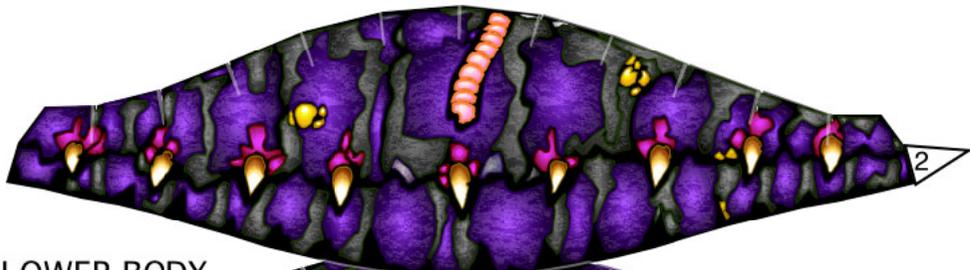

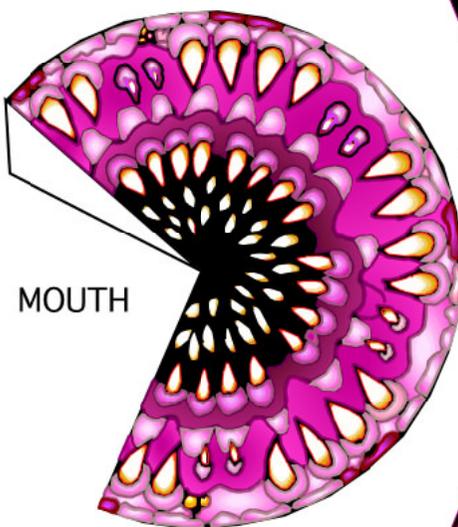

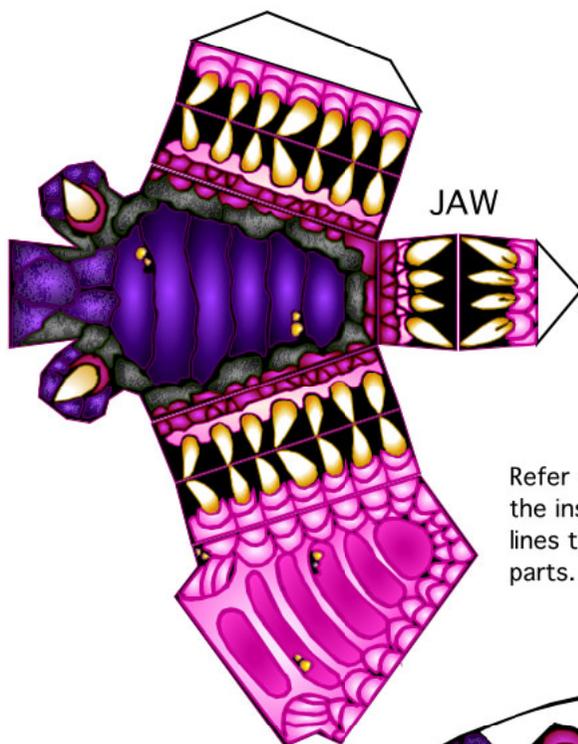

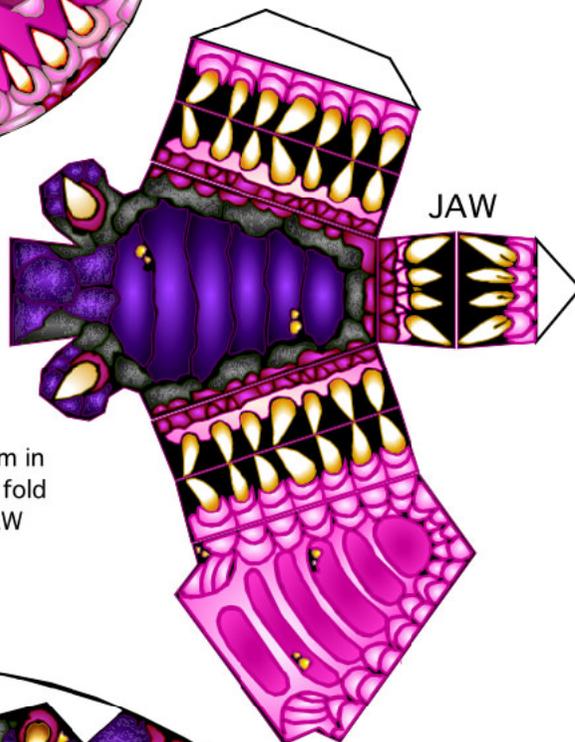

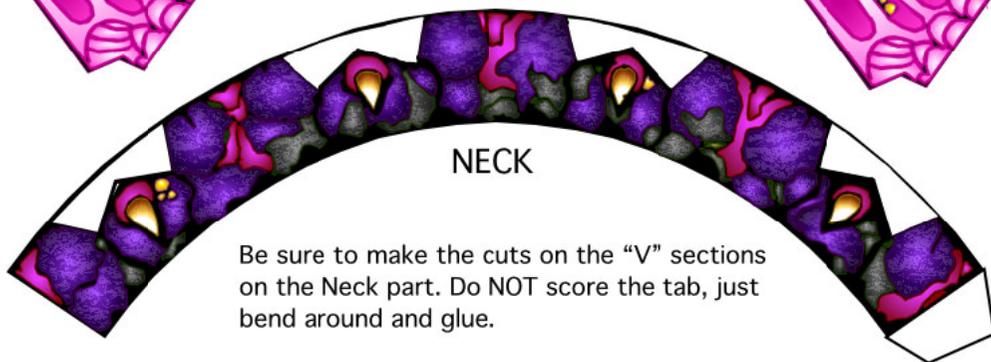

JAW

Refer to the fold diagram in
the instructions for the fold
lines to score on the JAW
parts.

NECK

Be sure to make the cuts on the "V" sections
on the Neck part. Do NOT score the tab, just
bend around and glue.
