MOD-KIT How to build and mod your own figurines and scenery

Easy Ruins are... easy to assemble in just three simple steps:

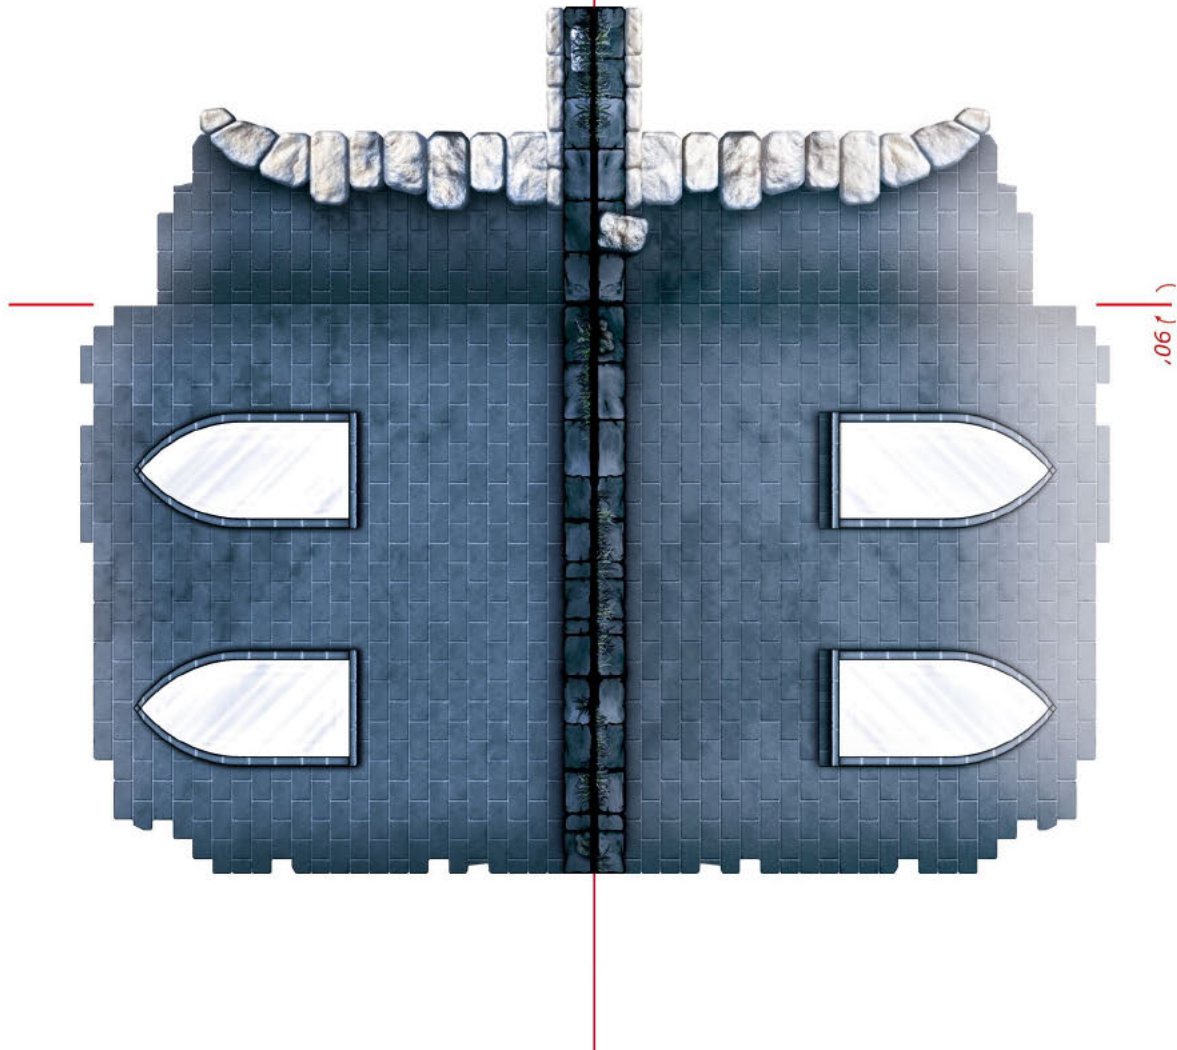

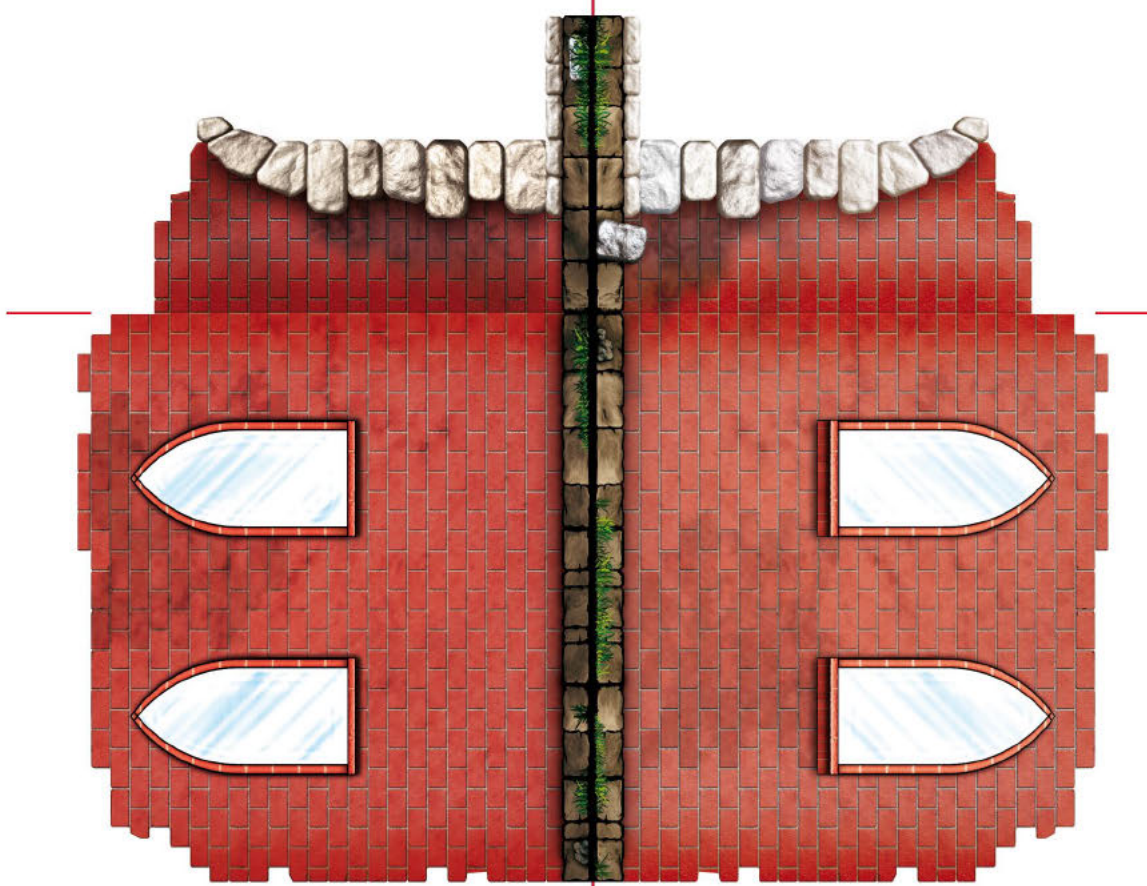

- print sheets then cutout needed elements
- fold and glue fronts and backs, edge with black or color markers
- bend glued wall and voila!

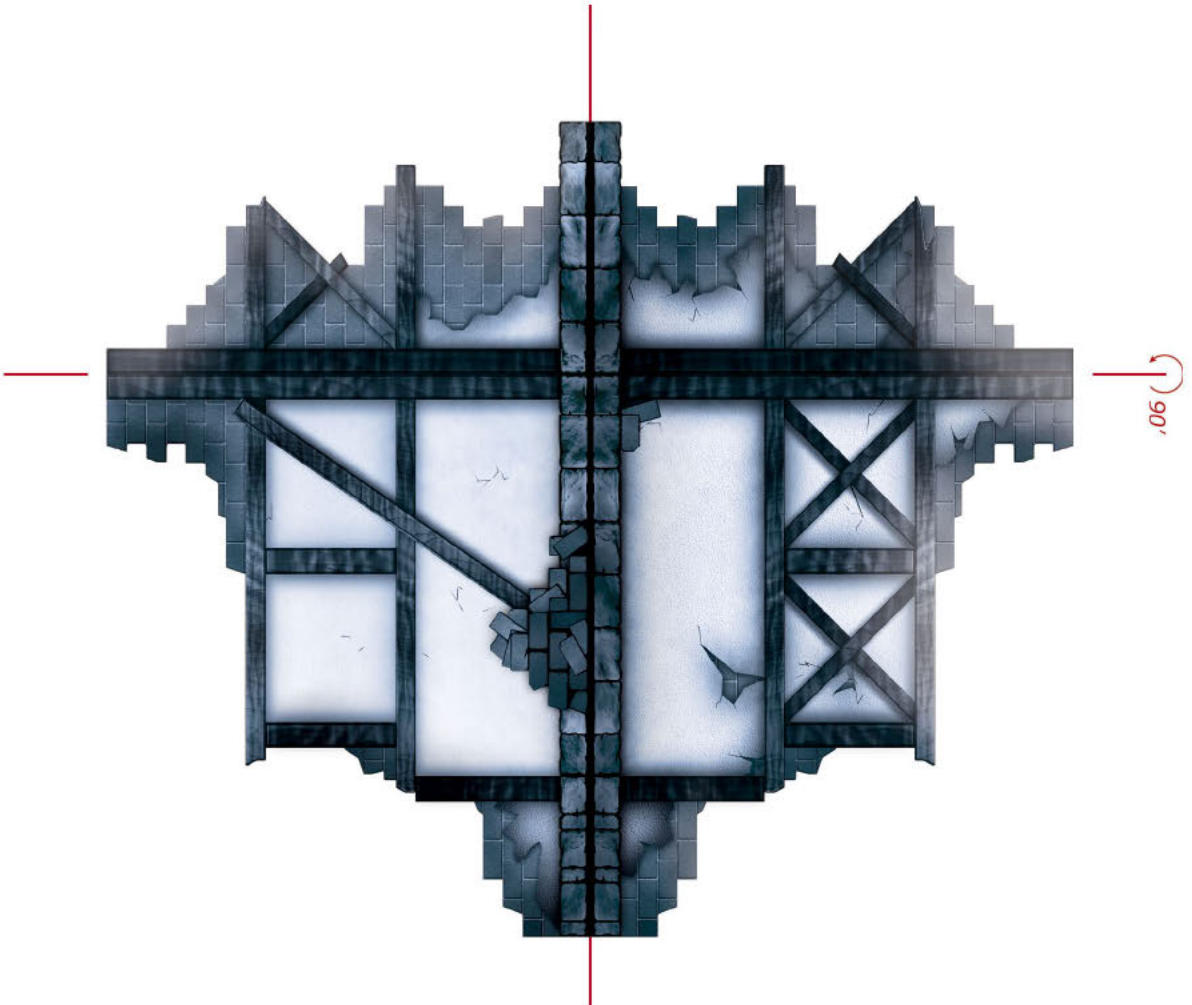

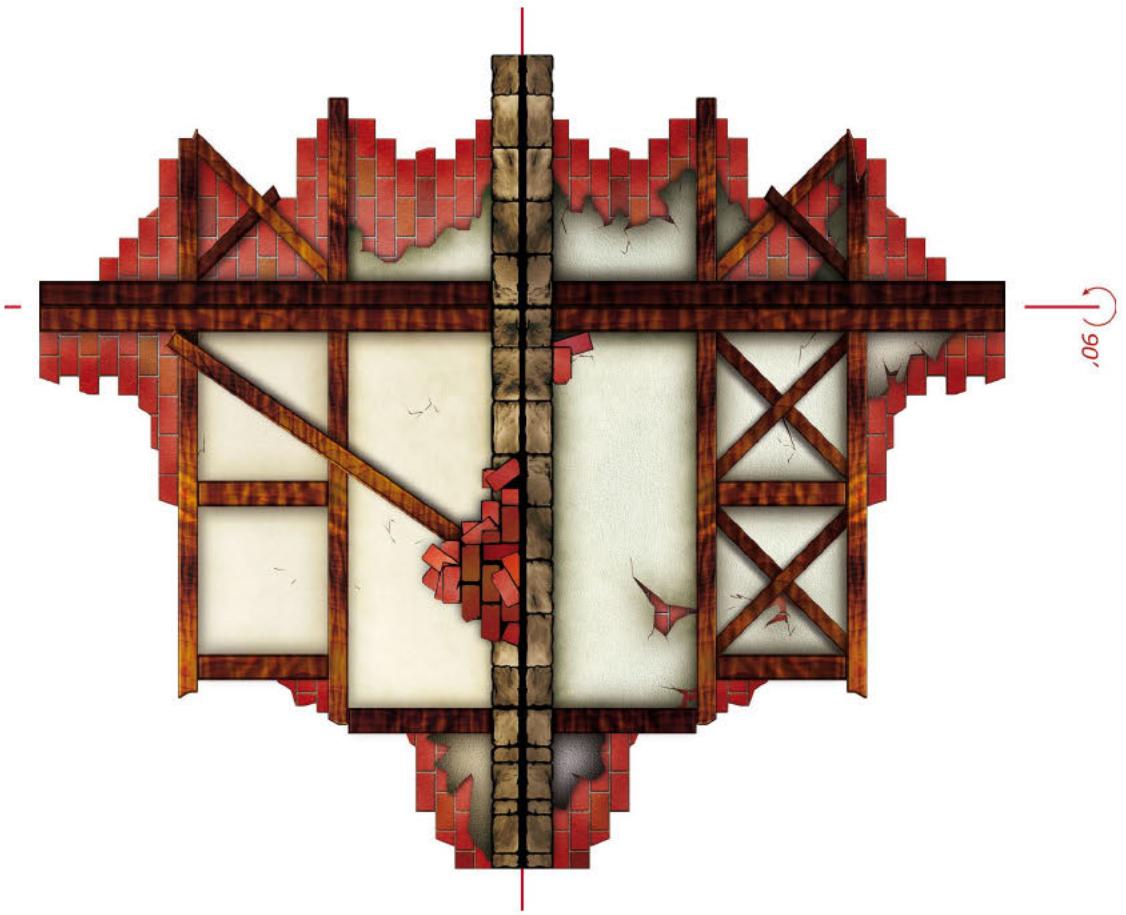

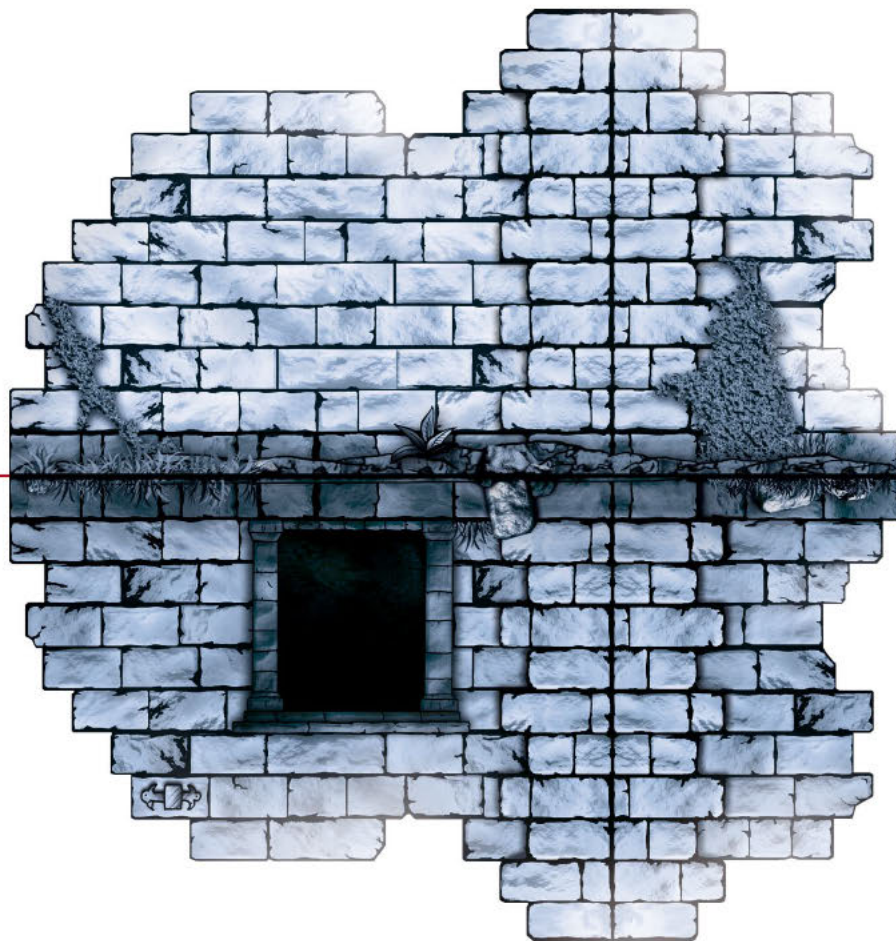

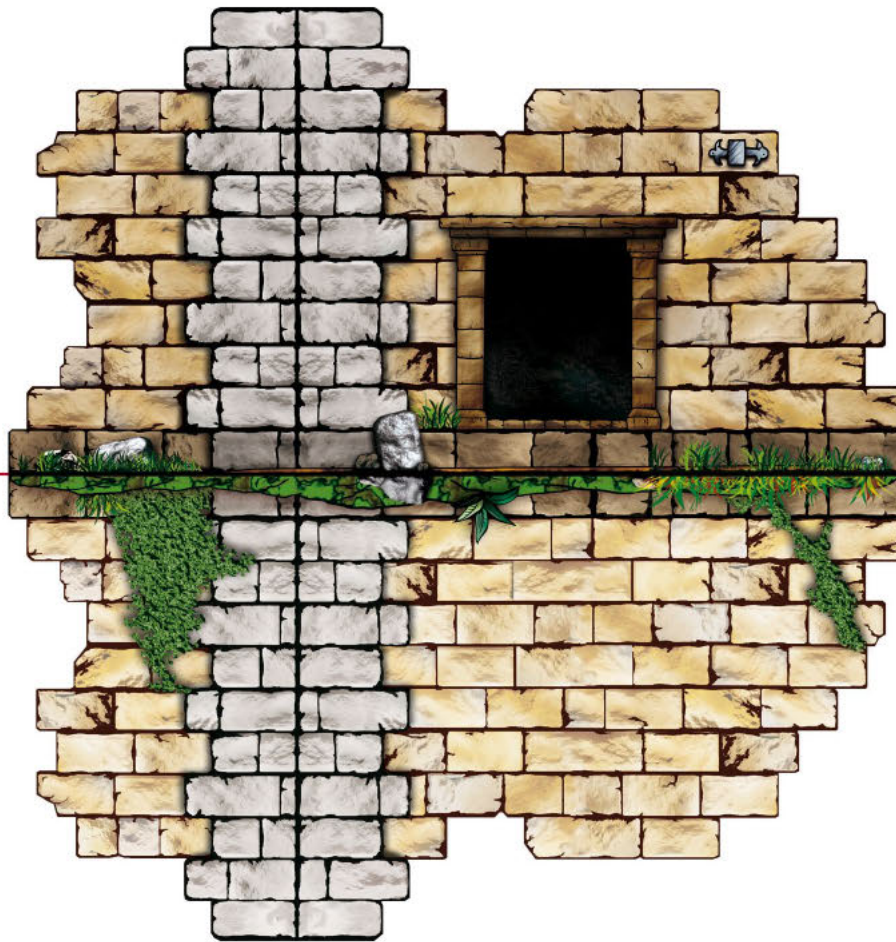

Create your own ruins and build your own scenery using premade components and props
You can also mod your ruins by adding accessories like various doors, windows, shields etc.

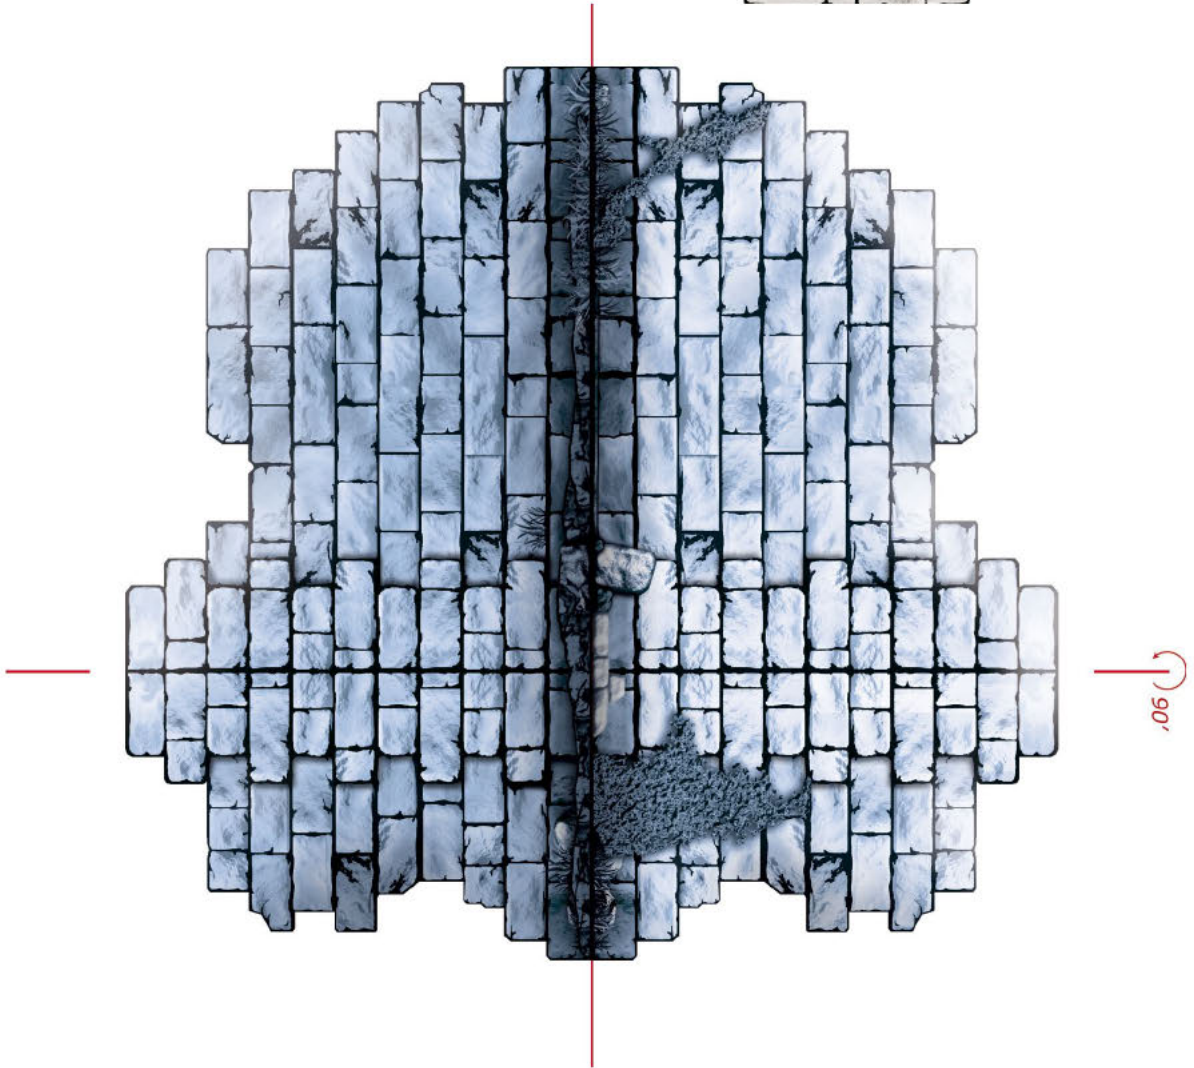

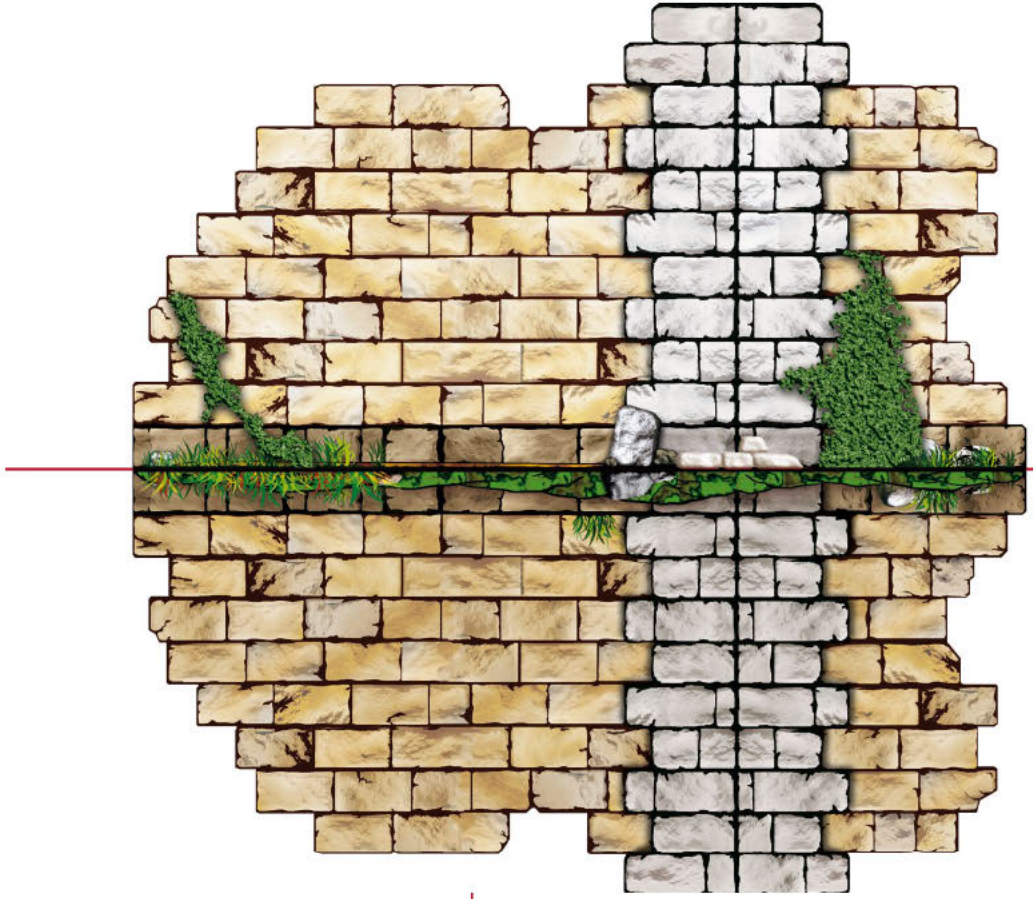

Enhance your gameplay with figurines, accessories and scenery from other PERMES sets
Enjoy!
