

Warlord Templates

Earlier on in the year i created a set of reaver titan templates, now i have made a set of warlord templates.

I have made these templates in the style of the wralord pictured in the apocalypse rule book and i hope that they are good enough for you.

The teamplates have got tabs and where there are numbers it indicates where you should join edges. because of the size of the warlord these templates have got several places where you need to join 2 pieces without a tab, here i suggest you reinforce the join.

have fun with them
