

RENEGADE

MAP PAGES

0 hr: Renegade - map pages

Copyright 2013 by Ryan Wolfe

Permission is given to the purchaser to reproduce these maps for personal, non-profit, use.

This document contains the individual map pages for the ship. They can be printed out, trimmed, and placed end to end to map out the habitable locations on board. Note that there is some overlap between map pages. This and the accompanying diagrams are meant to help in determining how the pages match up.

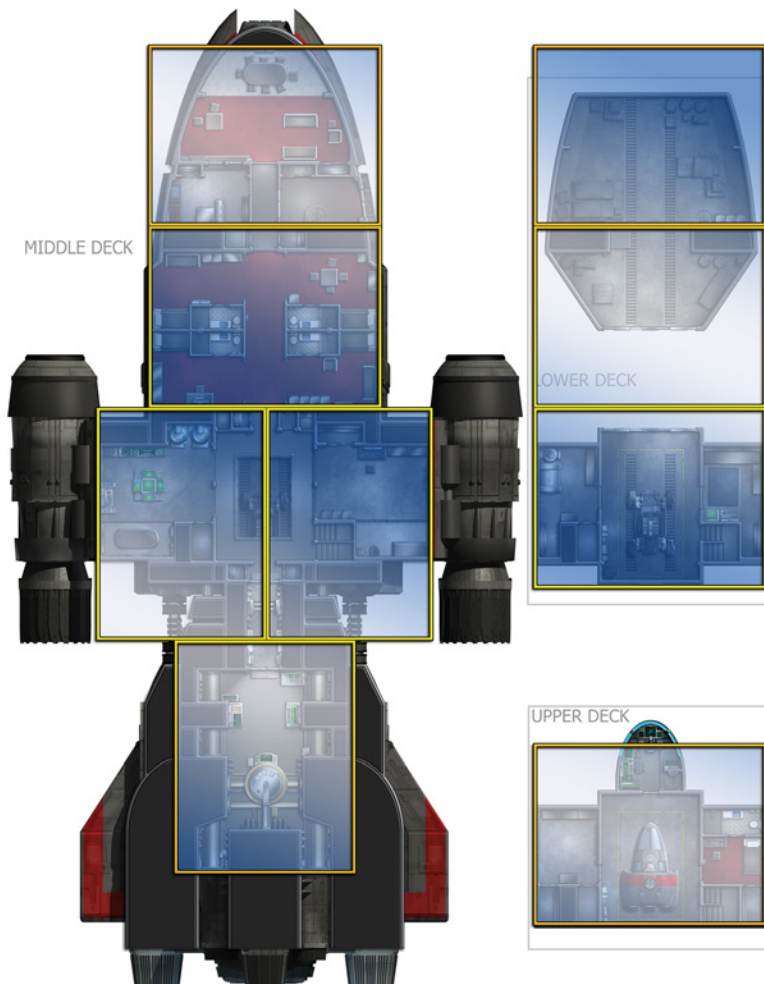

This PDF document was constructed with layers to allow for some customization of display. The layers are:

- **Optional** items such as cargo and carried vehicles.
- **Grid**: 1 inch grid, with each square representing 5 feet.
- **Black & White** version of the primary map elements.
- **Ship**: an exterior view of the top (or bottom) of the ship
- **Background** image with the primary map elements.

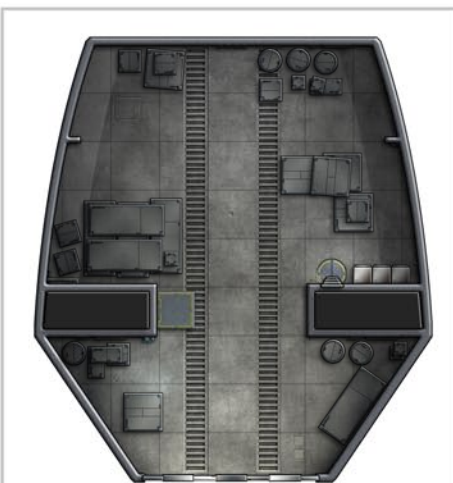

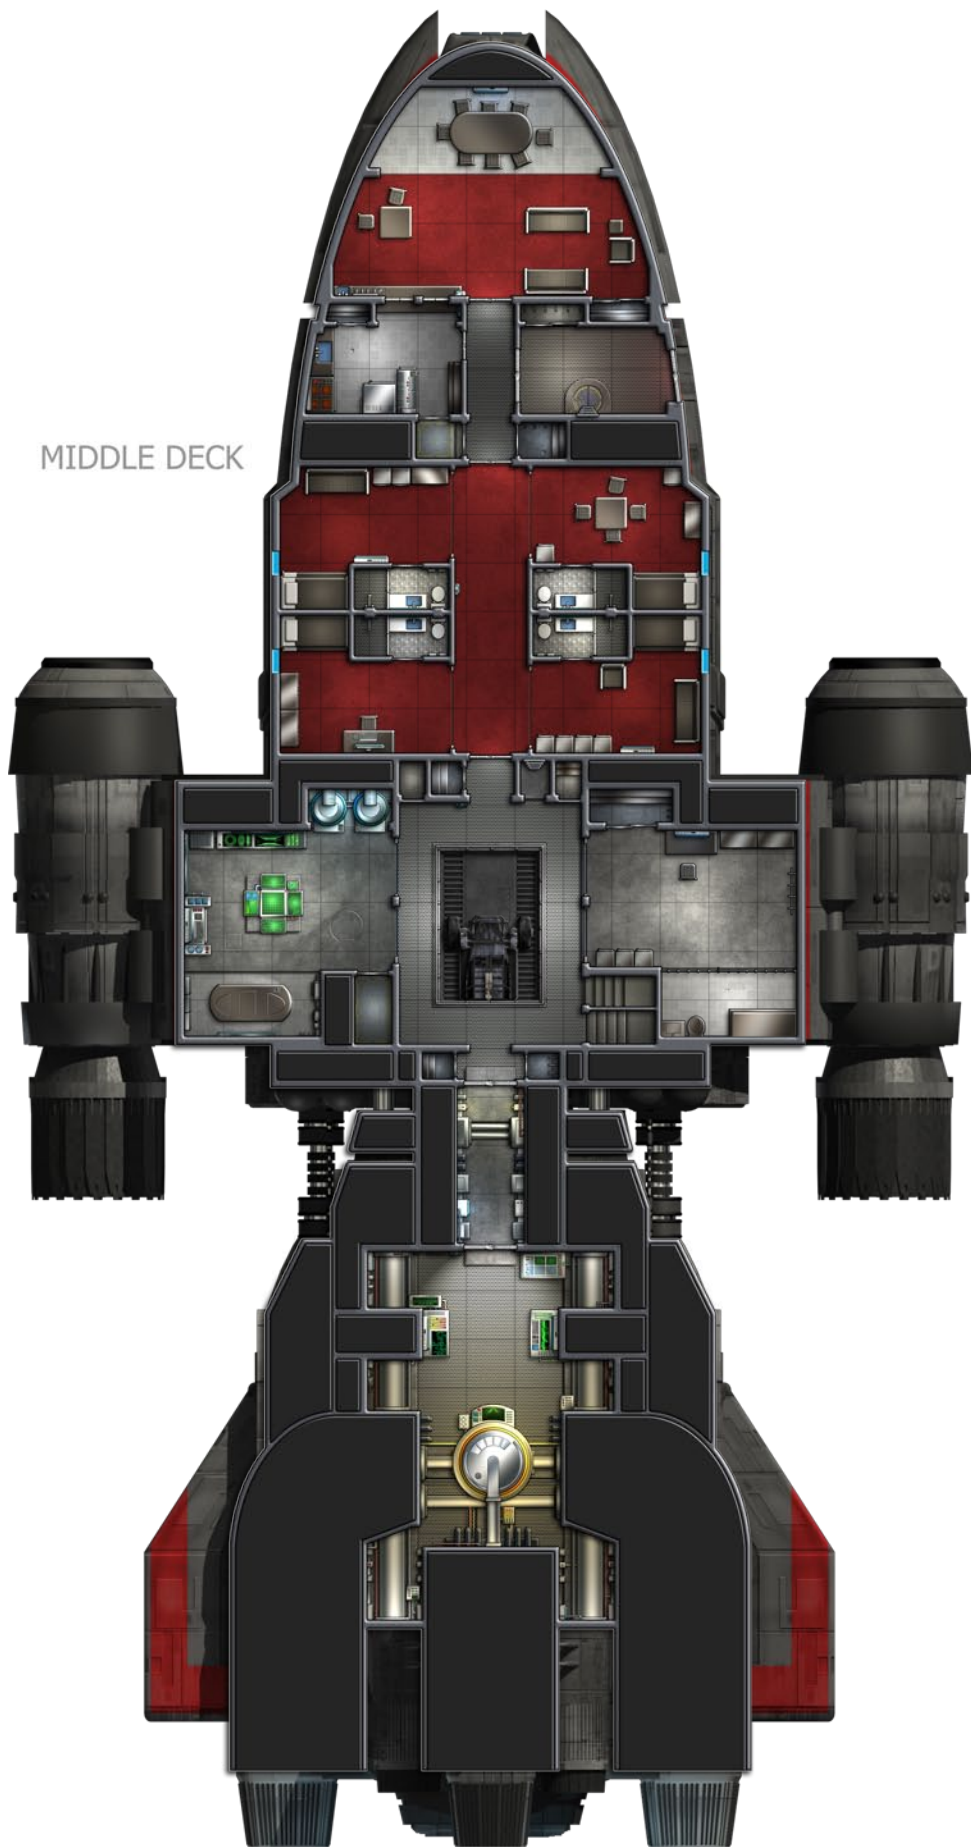

The upper deck is presented first. There are two pages for this deck though they overlap greatly. One is oriented lengthwise so that the whole central area (including the full flight deck) can be viewed. The other is oriented widthwise in order to completely display the armory and captain's quarters.

Next are five pages used to build the middle deck. The first two should be laid out widthwise (landscape) and the last three lengthwise (portrait mode) as shown in the diagram. Following this are three pages for the lower deck. All of these are oriented widthwise. Lastly, a single page showing the interior of the Lokai-class shuttle is provided.

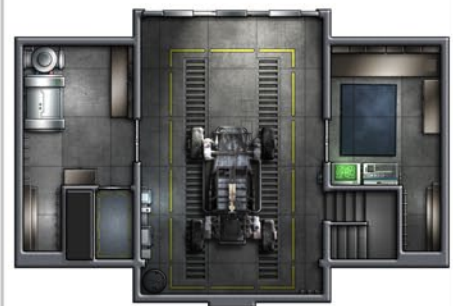

Note that the furniture in the Workroom (section 11) is "Optional". This allows for that particular room to be rendered empty and so be more easily customized should you desire to create a unique layout.
