

CRUCIBLE

MAP
PAGES

A large, stylized text "MAP PAGES" is overlaid on a futuristic, high-tech interior of a vehicle or station. The interior features a large circular window showing a blue energy field or plasma. The text is rendered in a metallic, three-dimensional font.

0 hr: Crucible - map pages

these maps for personal, non-profit, use.

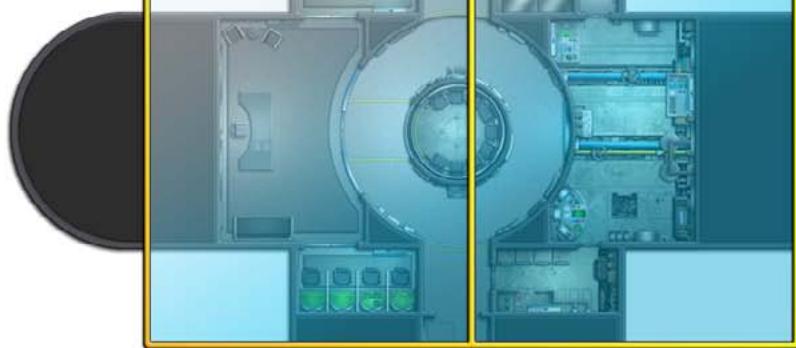

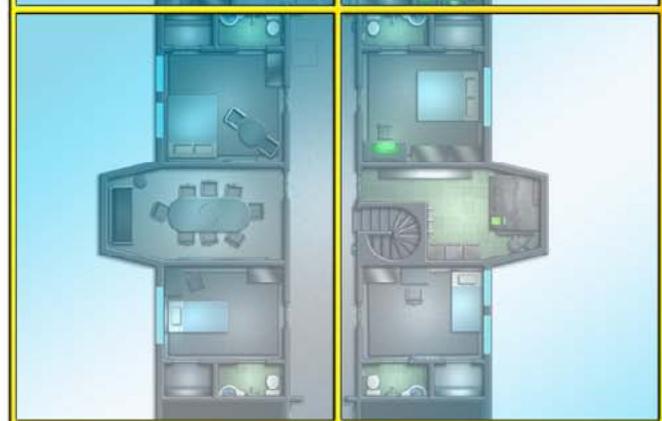

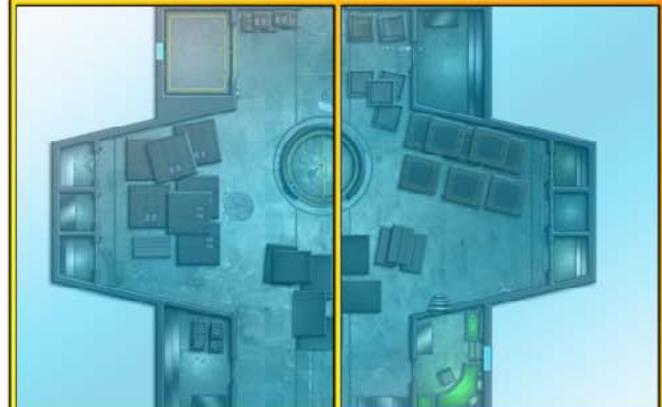

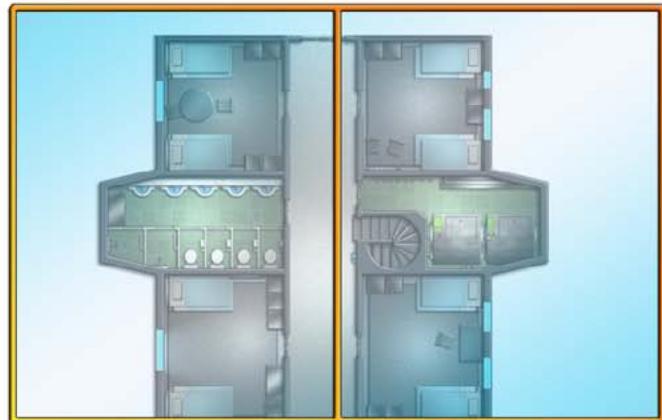

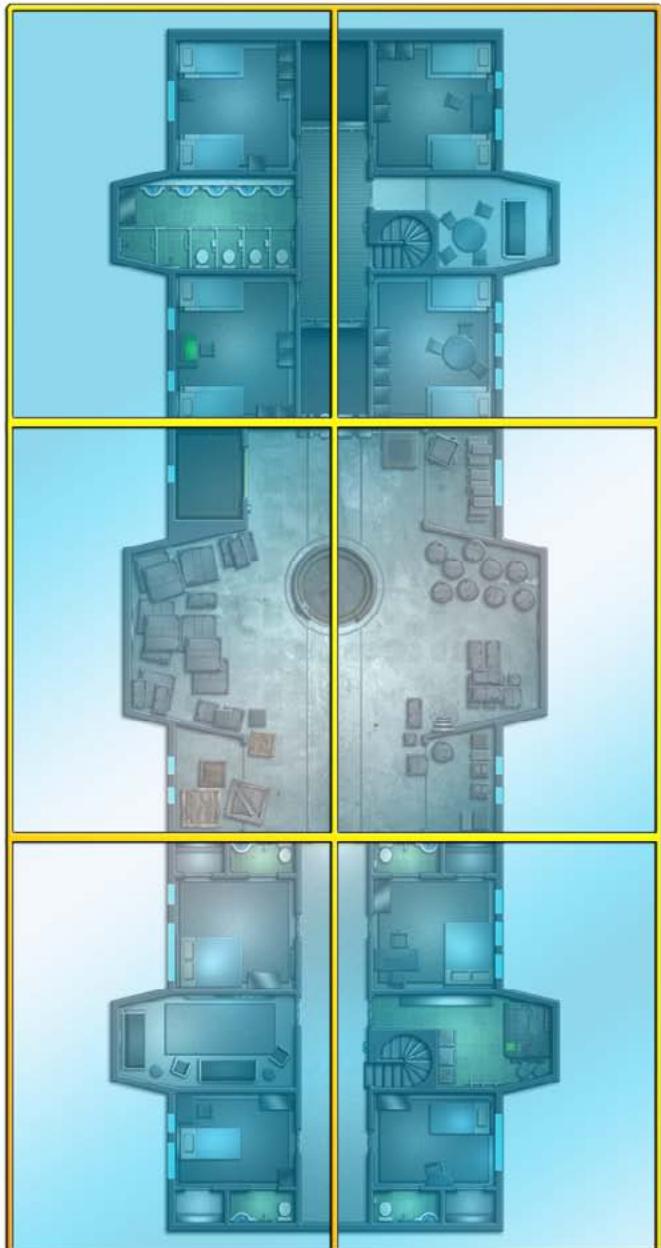

This document contains the deckplans for the station broken into pages. They can be printed out, trimmed, and placed end to end to map out the habitable locations on board. This file was constructed using layers to allow for some customization of display. The layers are:

- Optional cargo.
- Grid: 1 inch grid, with each square representing 5 feet.
- Black & White version of the primary map elements.
- Ship: an exterior view of the station under the map.
- Background image with the primary map elements.

The hub of the station is displayed first, followed by each of the three ring sections. The hub itself consists of four small levels that take a total of 14 pages (plus 2 duplicate overlaps) to map out. Each of the three ring sectors uses 8 pages to map the lower level of the sector and 6 pages to map the upper level.

The following images show how the map pages are laid out for each section of the Crucible-class space station. These are followed by small composite images meant to provide a high-level overview of each section (hub and ring) to help with page assembly.
