Drake

Drake is a four level ship. The topmost level is the bridge (one page). Below that is the two-page science deck and then the main deck (ten pages). The lowest level in the ship is the cargo deck, which has three map pages. After that are a few extra pages – one with a Sparrowhawk sans background (and an escape pod), and a couple with the hangars sans Sparrowhawks. The empty hangers have also had their bay doors cut down the middle so that it is feasible to land and launch longer craft.

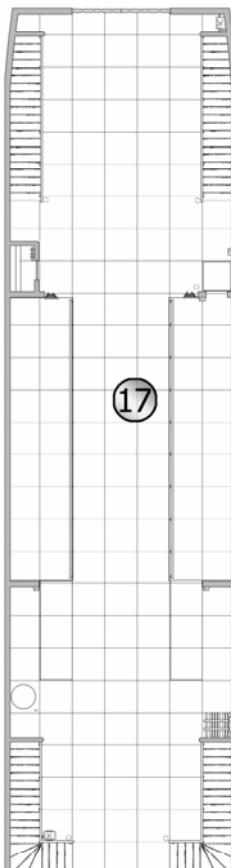

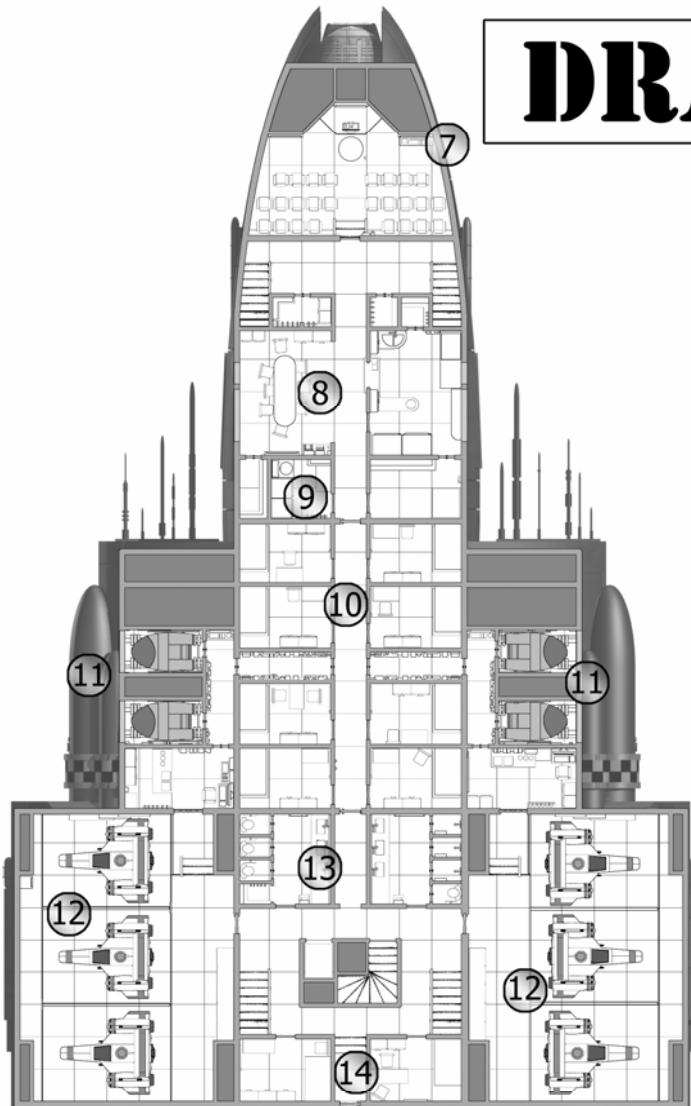

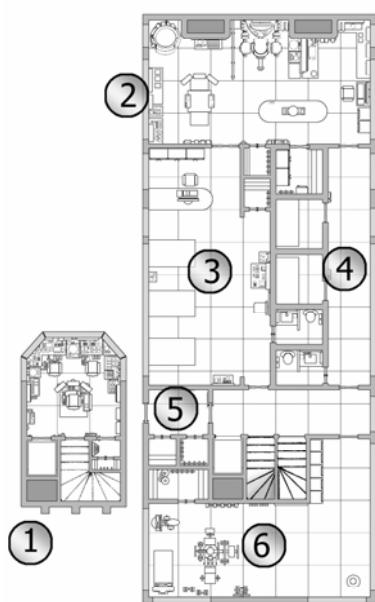

In this document, the ship is laid out from top to bottom, front to back. Note that there is considerable overlap along the perimeter of the maps. Refer to the composite maps when in doubt about how to assemble the pages.

This document was created in its entirety by Ryan Wolfe, © 2006. Permission is given to reproduce these maps for personal, use.
