FUTURE ARMADA

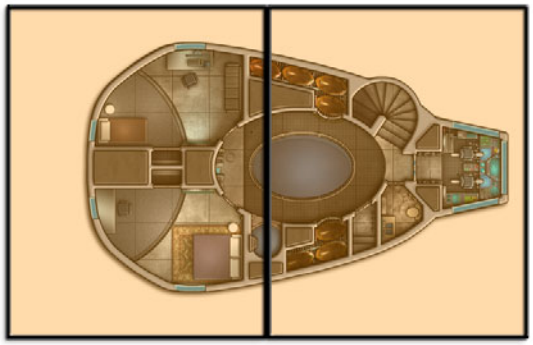
MIDNIGHT ROSE

MAPS

Midnight Rose

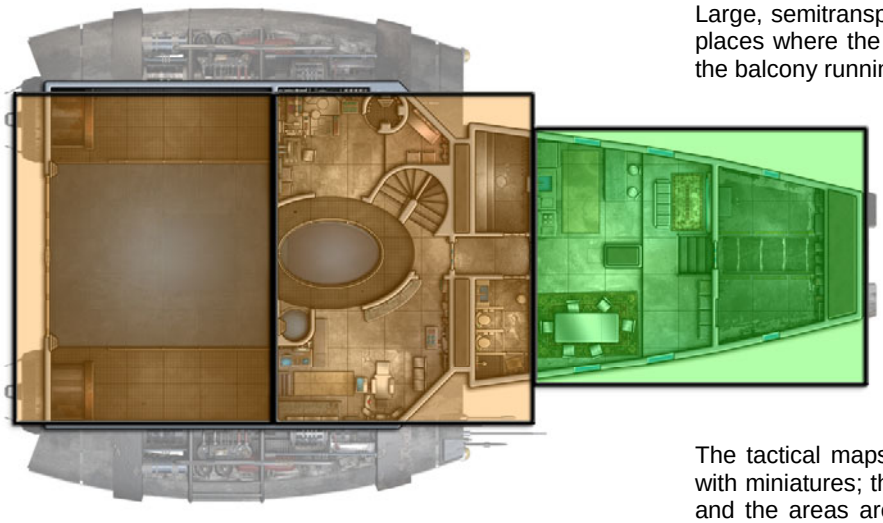
This document contains the interior maps for both Midnight Rose and the Breca-class variant. It also includes a couple of interior pages with empty rooms (for customization) and a selection of cargo containers.

The 3-deck Midnight Rose is presented first - from top deck to bottom, front to back. A couple of duplicated pages with empty rooms (for customization by hand) are also provided.



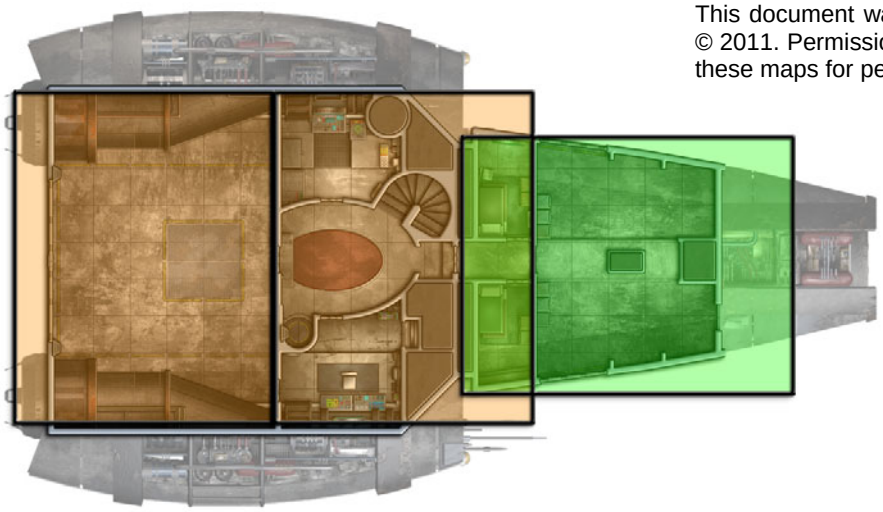
The Breca-class transport is presented next, with the pages in the same order as for Rose. Lastly, images are provided for a variety of cargo boxes and a pair of shipping containers. These are to scale so that they can be cut out and placed in the hold if desired. Interior maps for three varieties of container are included.

The image to the left shows the page layout for these ships. Note that a couple of the pages are oriented differently from the rest. These are the green pages in the diagram. When constructing the map, refer to this layout and the composite map on the following page to see how the pieces fit together.



Large, semitransparent, blue areas on the map pages are places where the floor is open to the deck below (as with the balcony running along the sides of the cargo hold).

The tactical maps in this document are designed for use with miniatures; the squares represent roughly 5ft spaces and the areas are laid out so that the pages can be cut and then put down edge-to-edge as needed. Note that there is some overlap on the maps to facilitate taping. If the pages are going to be put down exactly edge to edge, then this overlap should be trimmed accordingly.



This document was created in its entirety by Ryan Wolfe, © 2011. Permission is given to the purchaser to reproduce these maps for personal, non-profit, use.
