# BORDERLAND KEEP

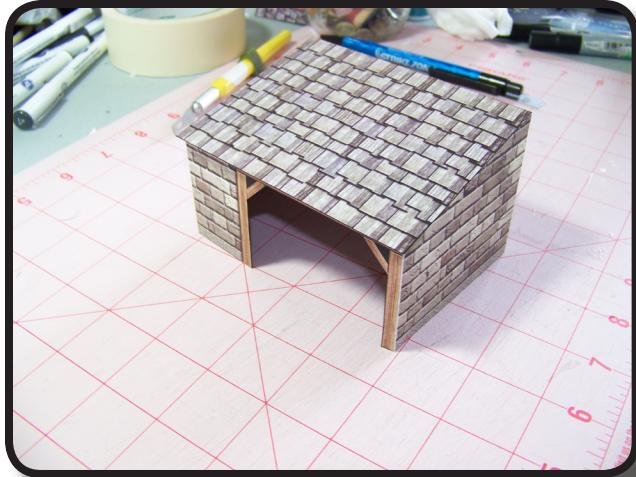

## Interior Building #2 and #3 Instructions

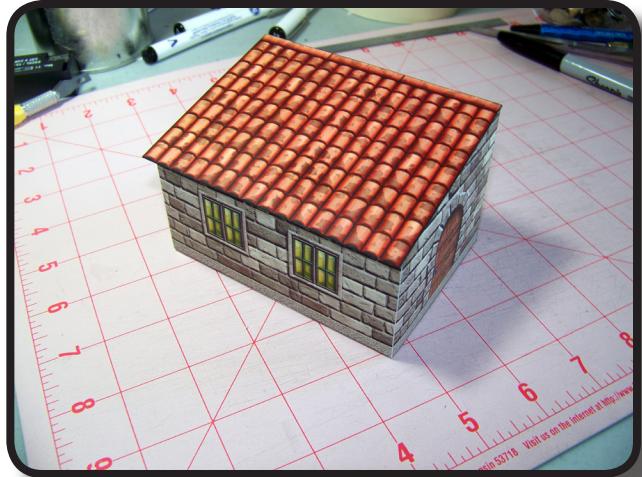

Step 1: Cut and score all wall and roof pieces as depicted above.

Step 2: The main model needs to be built in several stages. First, fold and glue the center wall section as shown above. When dry cut out the opening in the center. Once this is complete fold the walls into a square and glue. Once dry fold the inside walls in and glue.

Step 3: Once the main model is finished glue the roof section and set aside to dry.

Interior Building #2 assembles in essentially the same way but without any cutting of the wall once it is glued.
