Making Fantasy Fantastic

**Welcome to the E-Z line of fantasy and sci-fi tile sets from Fat Dragon Games!**

First and foremost, I wish to thank you for purchasing this set. Without your support, Fat Dragon Games would not be in business. I welcome any and all comments or questions about our products and I do answer all of our e-mail personally. Please do not hesitate to e-mail us for any reason, we love hearing your ideas and comments. Check our web site [www.fatdragongames.com](http://www.fatdragongames.com) for photos of our built up model sets and for announcements of exciting releases in our **E-Z Tiles** product line.

Now, on to the tiles...

E-Z TILES offers you the most flexible modular tile system on the market. To use this product you must have Adobe Acrobat Reader 6.0 or higher (available free from Adobe.com). In the Acrobat LAYERS palette, you can turn the various items in each tile on or off. Skeletons, treasure chests, tables, traps and more. Each tile can be customized to create the ultimate tile for your miniatures game. We welcome any suggestions you have for future tile sets and look forward to reading your comments!
