| Width:  | 2.15m                                                                                             |

|                    |                                        |
|--------------------|----------------------------------------|
| Height:            | 1.75m                                  |
| Ground clearance:  | 0.37m                                  |
| Turning radius:    | 7.0m                                   |
| Max. road speed:   | 112km/hr                               |
| Fording depth:     | 1m                                     |
| Gradient:          | 60%                                    |
| Vertical obstacle: | 0.5m                                   |
| Trench:            | 0.25m                                  |
| Armor class:       | 60 (XX for M996/M997 Armored versions) |
| Armament:          | none                                   |
| Ammunition:        | none                                   |

Morrow Project equipment is per standard vehicle load + autonav. These versions also have two or four stretchers, a full medical Kit (as per PG 27 of **TM 1-1** and one drug kit as listed described in Gary Gore's list. This includes lots of medical equipment that you might find in an standard ambulance such as defibrillators, IV drips, etc.
