

ALIASQTIP'S EXCLUSIVE ADVENTURE PACKS

CATHEDRAL AND GRAVEYARD SET

Includes:

- Wrought Iron Fencing
- Stained-Glass Windows
- Iron Prison Cage
- Small Wooden Castle Door
- 2 Coffins
- Tombstones

Instructions / Notes:

- Print the wrought iron fences and the prison cage (with window panes) onto printer transparencies. Print the other pages onto standard cardstock.
- Score (and sometimes reverse-score) along the fold-lines to make folding easier. Be careful when scoring transparencies as it is easy to cut through them.
- Glue the transparent window panes between the layers of the finished window frames.
- There is one solid, complete stained-glass window to use if you prefer non-transparent windows or don't have access to printer transparencies.
- You can cut the door to make it functional or remove it entirely to create an archway.
- The window and door panels slip easily between castle pieces and are held lightly in place by the side-tabs.
- To use the fence, slip the fence tabs between HeroScape tiles along their "fault lines". Remove unnecessary tabs to bridge across solid tiles.
- Use clear tape to construct the cage. You can either load the cage from the top or cut off the bottom section in order to place the cage over figures.
- The tombstones slip in between tiles just like the fence sections. There are two blank tombstones to add your own epitaphs.
