Tips

Score the edges that you need to fold, lightly with a craft knife.

Once the model is completed white edges, where the model has been scored and folded, will be visible. With diluted black paint gently run a small paintbrush over these white edges. This will greatly enhance the overall appearance of your model.

1. Solid lines should be folded outwards. (Sandwich Fold)
Apart from skull see illustrations for folding skull.

2. Broken lines should be folded inwards. (Valley Fold)

The use of sharp instruments should be done under the supervision of an adult.
